

PRO-MATH CHALLENGE GOES TO IPOH

Universiti Teknologi MARA Perak Branch in collaboration with the Ministry of Education are working together to organise programmes that inspire better quality of life of the people through the mastery of science, technology and innovation. Its application focuses on emphasizing the education system in the fields of Science, Technology, Engineering and Mathematics (STEM).

Organised by Faculty of Computer and Mathematical Sciences (FSKM), Pro-Math Challenge is a programme initiated, in conjunction with STEM, to draw interest of school students in Mathematics. The theme of Pro-Math Challenge is 'Mathematical Application in Life' and in completing the challenge, the school students had to carry out simple and concise science experiments to improve understanding of Mathematics and Science applications. During the activities, school students were exposed to basic calculation concepts, measurements which emphasize on the importance of precision and accuracy as well as the concept of probability.

Given the opportunity to interact and deal with different levels of people, the FSKM students ran the activities by themselves, in which they were responsible to carry out the prepared modules to the school students. These modules are designed to test the skills of school students in Science and Mathematics that can help to prove to the students the enjoyment of Mathematics and change their perceptions towards the subjects.

The programme and activities went smoothly and this promotes and strengthens the collaborative relationships between different levels of educational institutions especially in Perak.
