ABSTRACT

This study was conducted to identify the awareness of the Muslim community in Kuala Selangor related to Maysir. Any form involving betting money is counted as Maysir. The study was conducted around the residents of Kuala Langat only which includes sub -districts such as Tanjung 12, Telok Panglima Garang, Bandar, Batu, Jugra, Kelanang and Morib. Questionnaires were used as research instruments and 100 sets were distributed using online methods as in the randomly selected WhatsApp application. The methodology of this study uses quantitative methods. Descriptive analysis was used to analyze the data in the form of percentage, frequency, mean, mode and median. The results of the study found that the mean value shown in each variable is at a high level that is the mean value is 4.682 in part B and 4.611 in part C. This study also found that there is a significant relationship between independent variables, namely awareness and understanding of Maysir in among the Muslim community in Kuala Langat. At the end of the writing of this study the researcher proposed to conduct a more in depth questionnaire on the understanding of Maysir. Researchers also suggest that other researchers can further expand their research aspects more widely, not only at the district level but also at the comparative level according to the states in Malaysia.

.

ACKNOWLEDGEMENT

First of all, we would like to praise and thank the presence of the Almighty God who has given me strength and good health and with His bounty I was able to complete this study. Without His blessing, we will not go this far. In addition, I would like to thank my supervisor Puan Rubiah Abu Bakar because without her guidance my task could not be done well like this. He always gave us support and guidance on how to do this study with the aim of producing good results. He inspired me to work even harder in completing this study.

Last but not least, I would also like to thank Universiti Teknologi Mara (UiTM) Dungun campus, Terengganu for giving me the opportunity to run this final year project in this final semester. Next, the highest appreciation is extended to my colleagues who both provided guidance to complete this study.

Finally, not to be forgotten are all my 100 respondents who are residents of the Kuala Langat area for their support and willingness to spend some time with me to fill out the questionnaire. I really appreciate your services.
