

CARBON To Diamond

On October 6, 2018, 200 UiTM students attended the 'Carbon to Diamond' workshop which was organised by the Faculty of Applied Sciences (FSG), UiTM Perak Branch, Tapah Campus. The talk and sharing session with Amir Hamdzan Hamzah, the CEO of Detik Niaga became an eye opener and inspired the participants who were among the Semester 3 students of Diploma in Science programme of UiTM Perak Branch, Tapah campus. The participants were selected based on their previous semester CGPA that ranges from 2.50 to 3.00.

This hands-on workshop was mainly organised to entuse motivation among the students to achieve CGPA 3.5 and above. This workshop intended to provide an exposure to the students on effective learning techniques by using effective mind-mapping methods since the methods can help to enhance the students' understanding and ability to memorise the learned concepts easily. In addition, the workshop is hoped to enable the students to perform well in their assignments and examinations; subsequently, they can graduate on time (GOT) with CGPA 3.5 and above.

The speaker, Amir Hamdzan stressed that active learning strategies such as mind mapping is very effective in learning complex or abstract science concepts. If students apply the learning strategies well, it helps to improve their learning ability and memory. The highlight of the workshop was when all of the participants were given a chance to involve in the hands-on group activity and did their own mind map for the learned science concepts after the talk had ended. The objectives of this workshop were achieved through the students' active participation in the activity and it is expected that the workshop can help to increase the percentage of graduates graduating with CGPA 3.5 and above in the future.
