## **ACKNOWLEDGEMENT**

First and foremost, I would like to say Alhamdulillah to Allah S.W.T. because I managed to finish the research on time. Next, I would like to say thank you to my beloved and wonderful family for giving their support from the initial stage until the final stage of the research. It surely helps a lot in gaining motivation and prevent I from become depress. Besides that, I also want to give my gratitude of appreciation to my supportive lecturer and advisor, Miss Ashikin binti Romli for providing and giving a lot of guidance when doing this research. Without his guidance, surely I will not be able to understand the research and finish it on time. Lastly, I would like to say thank you to all my friends for giving advice and teach me on things that I don't know and give some ideas in order to deliver a good research.

## ABSTRACT

**Abstract-** The purpose of this research is to make an attempt to predict the firm bankruptcy of PN17 companies in Malaysia. This research will use Return On Equity (ROE) the main indicator. This research includes independent variables which are total debt to total asset, cash to total asset, total asset turnover, inventory to total asset and asset turnover.

**Purpose-** There are three purposes of the studies which are exploratory, descriptive and causal. In this research, the dependent variable and independent variables are related to each other which are cause and effect, which means that this study is a causal research. The purpose of this study is to analyse and explore the relationship between working capital efficiency and profitability whether the result is positive or negative relationship. In addition, this research engage with hypothesis testing which it explains the nature of relationships that can be established between independent variables that debt ratio, average collection period, inventories turnover and current ratio.

**Design/methodology/approach-** data are retrieved from the utilizing journals, internet and DataStream for the annually period of 2010-2013. Multiple regressions are applied to as to find the result for this research.

**Findings-** By using the Multiple Linear Regression method, the researcher found Total liabilities to total assets has a significant relationship with the return on equity.

**Research limitations/implications-** The four selected independent variables of capital structure for only small percentage explanation of the dependent variable. Next is the difficulty on using the short period of data which is only provides five (4) years and only 15 listed companies in PN17 companies of Bursa Malaysia are using for the sources.

<b>Table of Contents</b>	<b>Pages</b>
1.0 Introduction	9
1.1 Background of Study	9
1.2 Problem Statement	10
1.3 Research Questions	11
1.3.1 Main Research Question	11
1.3.2 Specific Research Questions	11
1.4 Research Objectives	11
1.4.1 Main Research Objectives	11
1.4.2 Specific Research Objectives	11
1.5 Scope of Study	12
1.6 Significance of Study	12
1.7 Limitation of Study	12
1.8 Definition of Terms	12
1.8.1 Return On Equity	12
1.8.2 Total Debt To Total Asset	13
1.8.3 Bankruptcy	13
1.8.4 PN17	13
1.9 Summary	13
2.0 Literature Review	14
2.1 The Relationship between Financial Ratios and Predicting the Bankruptcy of Firms.	17
2.2 Summary	17
3.0 Research Methodology	18
3.1 Data Collection	18
3.1.1 Secondary Data	18
3.2 Variables	18
3.2.1 Dependent Variable	18
3.2.2 Independent Variables	18
3.3 Research Design	18
3.3.1 Purpose of the Study	18

3.3.2	Types of Investigation	18
3.3.3	Researcher Interference	19
3.3.4	Study Setting	19
3.3.5	Unit of Analysis	19
3.3.6	Time Horizon	19
3.4	Research Framework	20
3.5	Sampling Design	20
3.5.1	Target Population	20
3.5.2	Sampling Size	21
3.6	Test Consideration for Data Analysis	21
3.6.1	Descriptive Analysis	21
3.6.1.1	Skewness	21
3.6.2	F-Test	21
3.6.3	Normality Test	22
3.6.4	Correlation Analysis	22
3.6.5	Multicollinearity	22
3.6.6	Coefficient of Determination $R^2$	22
3.6.7	Zulkarnain Z-model	23
3.7	Summary	23
4.0	Data Analysis	24
4.1	Descriptive Statistics	24
4.2	Normality Test	25
4.3	Correlation Analysis	26
4.4	Multiple Linear Regression	27
4.5	Regression Analysis	28
4.5.1	F Test	29
