

A DAY WITH PERMATA

On April 26, 2019, a programme called 'Sehari Bersama Anak Permata' was organised by ASeT (Applied Sciences Tapah Association), UiTM Perak Branch, Tapah Campus at the Autism care centre; My Star Autism, Ipoh. A Total of 31 students and 4 lecturers from Faculty of Applied Science (FSG) were involved in this programme. The objectives of the programme were to inculcate the noble attributes among the FSG students such as loving, caring, helpful and generous attitude through friendly engagement with autism children, to provide opportunities for students to sharpen their leadership skills through teamwork and group activities, to practice communication skills in a challenging environment and to enhance the professionalism and credibility of the students and lecturers. This programme had also enabled the students to inculcate the sense of love in themselves and avoid discrimination against special people in the community.

The programme began with several speeches by Muhammad Aiman, the programme chairperson, Mr. Rabani Yaafar, the coordinator of the faculty's Research Division, Industry Network, Society & Alumni and followed by Ms. Cyrus, the representative of Dr Shan Narayanan, the owner of My Star Autism. Ms. Cyrus's speech has become an eye opener to UiTM students after she emphasised that we should treat children with autism as normal children rather than special children with disabilities as all children are God's gifts.

The students later mingled around and got to know autistic children through Ice Breaking activity. Then, a spring cleaning activity was carried out as the students helped to clean around the care centre to provide a clean environment for the children there. Besides, group activities were also conducted with autistic children after lunch such as playing chess, dam and congkak. Not only that, they were also having an innovative activity such as drawing batik patterns and making baskets using old newspapers. Other than that, a singing and dancing competition was also organised to stimulate the mental and physical development of the autistic children. This meaningful and interesting programme had received active participation from all children involved.
