## **ABSTRACT**

This is a systematic analysis of furniture selection by undergraduate students at the public university in Malaysia, who are in the very final stages of completing their final year thesis, using the fuzzy analytical hierarchy system and supply chain process comparison method. The following research present about fuzzy analytic hierarchy approach and supply chain operation reference method in order to evaluate a wide range of decision to solve problem.

## ACKNOWLEDGEMENT

In the name of Allah, Most Gracious, Most Merciful. Firstly, I am grateful to Allah S.W.T for giving me the strength to complete this project successfully. I would like to express my gratitude to Puan Rohayati Binti Mat Ripin for encouraging me to do my final year project.

I acknowledge with thanks the kind of patronage and timely guidance which I received from my supervisor. I express deep and sincere gratitude because of the guidance and encouragement have contributed to me to do this final year paper.

It is good and polite to give a note of appreciation and of thanks to those people who have helped in the project. Students should thank their supervisors or lecturers who had supervised or given advice. An author often thanks their family and friends.
