ABSTRACT

This study was carried out to identify the most factors that cause the student absenteeism and the effects towards their performance. The 100 respondents are comes from UiTM students in Sarawak Campus. The research was conducted by giving out the questionnaire to respondents for different courses, age, background and etcetera. A set of questionnaire was designed to gain primary data from the respondents about the factors that influence their performance the most. The overall findings of the study indicates that individual factor such as laziness, not interested to study and overslept was the most factors that majority of students experience while achieving some certain level of performance. In conclusions, some suggestions have been made to enhance the achievement of students and recommendation for future research has also been included in the final part of the report.

CHAPTER 1

1.0 INTRODUCTION

This chapter focuses on the introduction of a research topic that has been chosen. Other than that, this chapter provides the information regarding the study that need to be done. For example, this chapter explained the objectives, problem statement, scope of study, significance of study and theoretical framework. As a whole it can be said that this chapter can be overview towards this research study.

CHAPTER 2

LITERATURE REVIEW

2.0 INTRODUCTION

Literature review is the documentation of a comprehensive review of the published and unpublished work from secondary sources of data in the area of specific interest to the researcher. In this research, the source of data and information collected are from books, articles, and also sources from the internet regarding Absenteeism. From these data and information collected, summaries are made. The purpose of having literature review is to ensure that no important variable that has in the past been found repeatedly and being ignored
