

**UNIVERSITI TEKNOLOGI MARA**  
**UCS551: INTRODUCTION TO DATA ANALYTICS AND APPLICATION**

|   |  |
|---|--|
| <b>Course Name (English)</b>  | INTRODUCTION TO DATA ANALYTICS AND APPLICATION <b>APPROVED</b>   |
| <b>Course Code</b>  | UCS551   |
| <b>MQF Credit</b>   | 3  |
| <b>Course Description</b>   | This course is an introductory course on data analytics and its application, which include basic data management, methods to explore and visualize data effectively; as well as classification and data clustering using selected machine learning techniques. During the course, the techniques will be illustrated using a range of data and case studies with respect to the study program. |
| <b>Transferable Skills</b>  | Demonstrate ability to identify and articulate self skills, knowledge and understanding confidently and in a variety of contexts.  |
| <b>Teaching Methodologies</b>   | Lectures, Blended Learning, Lab Work, Discussion   |
| <b>CLO</b>  | CLO1 Demonstrate social skills in project related to data analytics<br>CLO2 Demonstrate ethics and professionalism in task related to data analytics.<br>CLO3 Analyze data with relevant techniques in data analysis and exploration.<br>CLO4 Apply statistical methods and machine learning techniques on data related to substantive domain in Malaysia                                      |
| <b>Pre-Requisite Courses</b>  | No course recommendations  |
| <b>Topics</b>   |  |
| <b>1. Introduction to data analytics</b><br>1.1) Definition of data analytics<br>1.2) The importance of data analytics<br>1.3) Framework and process of data analytics<br>1.4) Example of applications  |  |
| <b>2. Data Understanding</b><br>2.1) Data Type: structured and unstructured<br>2.2) Data Structure (vector, matrix, data frame, array, factor, list)<br>2.3) Level of Measurement<br>2.4) Univariate and Multivariate Data<br>2.5) Data representation with example |  |
| <b>3. Data Management and Data Quality</b><br>3.1) Data Cleaning<br>3.2) Data Transformation<br>3.3) Data Sampling<br>3.4) Data Sub-setting and manipulating  |  |
| <b>4. Descriptive Analytics and Visualizations</b><br>4.1) Central tendency measures<br>4.2) Dispersion measure<br>4.3) Data visualization tools  |  |
| <b>5. Machine Learning Concept and Techniques</b><br>5.1) Concept of learning<br>5.2) Concept of Training and Testing<br>5.3) Cross Validation<br>5.4) Supervised and Unsupervised Learning   |  |

**6. Machine Learning – Classification & Regression**

- 6.1) Decision Tree
- 6.2) Random Forest
- 6.3) Logistic Regression
- 6.4) Naïve Bayes
- 6.5) Support Vector Machine
- 6.6) Neural Networks

**7. Machine Learning – Clustering**

- 7.1) K-Mean
- 7.2) K-Nearest Neighbor

**8. Predictive Analytics for Unstructured Data**

- 8.1) Handling unstructured data
- 8.2) Emerging technologies of data analytics

| Assessment Breakdown  | %       |
|-----------------------|---------|
| Continuous Assessment | 100.00% |

| Details of Continuous Assessment | Assessment Type | Assessment Description | % of Total Mark | CLO  |
|----------------------------------|-----------------|------------------------|-----------------|------|
|                                  | Case Study      | n/a                    | 20%             | CLO4 |
|                                  | Group Project   | n/a                    | 10%             | CLO1 |
|                                  | Group Project   | project                | 20%             | CLO4 |
|                                  | Lab Exercise    | n/a                    | 10%             | CLO2 |
|                                  | Lab Exercise    | lab assignment         | 20%             | CLO3 |
|                                  | Test            | Test                   | 20%             | CLO3 |
