“In the name of Allah, the Most Merciful and the Most Compassionate”

This report would not have been done without the help and support of many individuals. Therefore, I would like to take this opportunity to thank all of the individuals that had been involved in helping me to complete this thesis project. I am highly indebted to Madam Mardziyana Binti Mohamad Malom for her guidance and constant supervision as well as for providing necessary information regarding the project and also for her support in completing the project.

Big thanks to my classmates who always shared opinions and experience among us and their co-operation helping me out in making this report accomplish. I also would like to acknowledge to the parties that help me in preparing this research either directly or indirectly.

Last but not least, special thanks to my parents and family who always support and give advices to me. Without their encouragement, I would not have to finish this research paper and also I hope this report will meet requirement and expectation of the faculty and the university.

ABSTRACT

Cash waqf is a waqf of cash money as the property donated to raise funds for endowment which is then converted to a permanent property and the remaining property could be utilized for the welfare and interests of society as a recurrent or persistent. Cash waqf is a waqf that can be removed easily compare to permanent waqf such as school or mosque (Drs.H.Sarmin.M.H.Hakim, 2002). The objective of this paper is to determine the cash waqf participation among young adult in Senai, Johor and identify the most significant factors that influencing young adult in Senai, Johor to participate in cash waqf. There are involving four independent variables which are attitude, subjective norm, perceived behavioral control and religiosity. In the process of findings, the descriptive analysis, reliability analysis, correlation analysis, and regression analysis are conducted using Statistical Package for the Social Sciences (SPSS). Data or sample description is using simple questionnaires. This paper is useful to know what factor most influencing young adult to participate in cash waqf in Senai, Johor. Beside that, this study will provide useful information and better understanding toward cash waqf participation among young adult and also gives better information on factor that influencing young adult participation on cash waqf in Senai, Johor.

CHAPTER 1: INTRODUCTION

1.1 INTRODUCTION

Cash waqf has tried itself as a source of funds in the new millennium as well as collection of fund to those in needs. It is also one of the ways that promoted by Islam. Benefits to be derived by a person is not only limited to continuous reward received, but can help puts more comfortable and conducive to the community as a whole. In this study, the first chapter will discuss generally about background of the study which focuses more on the relationship with cash waqf participation among young adult in Senai Johor with the factors that influencing young adult to participate in the cash waqf. Dependent variables in this study are cash waqf participation and independent variables are attitude, subjective norm, perceived behavioral control, and religiosity. Thus this chapter will include items such as background of study, problem statement, research questions, research objectives, significance of study, scope of study, and limitations of study. This entire chapter will serve as a guideline to avoid any confusion on the study conducted.

1.2 Background Of study

Cash waqf is one way to increase the fund to add assets in the country and also to protect the interests of Muslims. Beside that, when cash waqf collected, the responsible party can use the waqf money to develop or provide a service to the community and help those in need. This is one way to solve the problem and raising funds. Moreover, this method is less recognized by the public, especially young generation. Cash waqf method is more simple than waqf property, which not all people have their own property, now the cash waqf become easier with the availability of various facility available to those
