ABSTRACT

In order to enhance the performance of wireless network in Long Term evolution (LTE) is by deployment of the femtocell (small size cell) network. However, the existing of the femtocell and macrocell will lead to difficulty in handling the radio resource allocation. This paper will discuss about management of radio resources allocation in LTE femtocell due to increasing number of femtocell cluster. The goal is how to fulfill greater demand with the limited resources. The main problem is to achieve the goals even though the resource allocation issue has been widely discussed. Most of the research discussed about macrocell instead of femtocell which is the network is not frequently congested. As for now only one paper considering the limitation of transport network not the congestion of network in scheduling mechanism. In said paper they assume that only single cell is bound to the transport backhaul compared to the real life which have more than a cell can share the same transport network. The real-time simulation will be implemented by using simulation. By using Qualnet simulator, all data analysis of the coverage of each femtocell and throughput has been analyzed to meet the requirement of the user satisfaction by manipulate the resource allocation by considering the changes of transmission power usage in each cells.

ACKNOWLEDGEMENT

In the name of Allah S.W.T with the deepest sense of gratitude of the Almighty ALLAH that gives me the strength and ability to complete my MSc project as it is today.

I would like to take an opportunity to express my special thank you and my gratitude to my supervisor Prof Dr. Mohd Dani Baba for his patience, his willingness to advice, guide, support and encouragement given to me during the time period of this project.

Without his kindness, guide and encouragement the project may not achieve its goal. Besides that, I would like to thanks those that have indirectly contributed their opinion and effort to realize this project successfully. Special thanks to all my family for their full support, my dearest MSc classmates who's continued to provide help and encourage me all the time.

May Allah bless and reward them for their generosity.

Thank You.

TABLE OF CONTENTS

	PAGE
AUTHOR'S DECLARATION	ii
ABSTRACT	iii
ACKNOWLEDGEMENT	iv
TABLE OF CONTENTS	v
LIST OF TABLES	vii
LIST OF FIGURES	viii
LIST OF ABBREVIATION	ix
CHAPTER ONE: INTRODUCTION	1
1.1 Overview	1
1.2 LTE Technology	4
1.3 Femtocell	6
1.4 Radio resources allocation	7
1.5 Problem statement/Problem identification	8
1.6 Research objectives/Research questions	8
1.7 Scope and limitation of the study	9
1.8 Significance of the study	9

CHAPTER TWO: LITERATURE REVIEW	10
2.1 Introduction	10
2.2 Other Researcher Proposed	10
CHAPTER THREE: METHODOLOGY	17
3.1 Introduction	17
3.2 Flowchart	18
3.3 Classification of Radio resource allocation	19
3.4 Reinforcement-learning	21
CHAPTER FOUR: RESULTS AND DISCUSSIONS	26
4.1 Introduction	26
4.2 System Model	26
4.3 Simulation Scenario	28
4.4 Simulation result and evaluation of data.	30
CHAPTER FIVE: CONCLUSION AND RECOMMENDATIONS	34
5.1 Conclusions	34
5.2 Recommendations	35
