ACKNOWLEDGEMENT

I am very grateful to be able to prepare this proposal successfully. This proposal would never been completed without the guidance from the advisor, help from friends and support from family. Besides that, I am thankful to Allah for answering my prayers for giving me the strength in order to complete the proposal despite this research really challenging researcher specifically in terms of time.

I would like to also express highest appreciation and thankfulness to my advisor, Pn Aflah Binti Isa for her excellent guidance, caring, patience and providing me with an excellent atmosphere during completing this proposal.

Highest appreciation also goes to the class members who always shared opinions and experience among us. I also would like to acknowledge the parties that helping us in preparing this research either directly or indirectly.

Last but not least, special thanks to my parents and family who always support and advices. Without their encouragement, researcher would not able to finish this proposal paper.

ABSTRACT

Citizens in Malaysia especially Malays are not consent about Islamic estate planning as well as Islamic wealth management. Therefore it leads to unclaimed asset as well as frozen estate. According to (Mujani, Hussain, Yaakub, & Rashid, 2012) , it has been estimated that RM42 billion worth of asset had not been claimed by the heirs. According to the previous researcher, the cases of unclaimed inheritance and frozen estate have been on the rise. Moreover according to (Hassan & Abdul Rashid, 2014) recent statistic shows that some 52 billion worth of asset waiting to be distributed among the heirs. Therefore it is important for this research to be done in order to determine the factors that inhibiting wasiyyah practice. This is because by leaving wasiyyah, this will help to reduce the cases of unclaimed inheritance and frozen estate.

CHAPTER 1

INTRODUCTION

1.1 INTRODUCTION

This chapter will discuss briefly on the background of study, problem statement in the study, research questions and research objectives, significant of the study and also summary of chapter 1. This research is focused on the factors inhibiting wasiyyah practice among Malay community in Pekan, Pahang. Here, an explanation of the dependent and independent variables is provided and this study is to determine the relationship of the variables involved.

This research will discuss about dependent and independent variables. Dependent variable in the occurrence wasiyyah practice and the independent variables is the selected factors that are presumed to significantly inhibiting wasiyyah practice. The selected factors are knowledge, perception, attitude and organizational. This relationship is the subject matter of the problem statement of this research whereby it is to determine the extent of the selected factors that inhibiting wasiyyah practice.

The research questions in this chapter will discuss about the question related to the theoretical framework in the research. There are two (2) types of research questions, firstly is the main research question and secondly are specific research questions. The main research question is related to the dependent variable that is the main research of the
