ABSTRACT:

Crossfunetics is a collection of crossword puzzles for intermediate English speakers which fixate on phonetic spelling skills and pronunciation. This game-based learning method is devised with the goal to remediate second language learners' lack of English phonetics awareness that may affect intelligibility and communicative competence. The method entails compiling phonetic lessons, proofreading, editing materials and promoting them on social media, in addition to prototype assemblage. Feedback was gathered from UiTM Melaka Part 5 English for Professional Communication (LG) students via google form, and it can be concluded that the majority of them relished the puzzles for revision purposes. The intent is getting *Crossfunetics* to be obtained and circulated by UiTM for LG students across Malaysia.

Keywords: Phonetics, Crosswords, English, Revision, Pronunciation

1. INTRODUCTION

Malaysia's diverse population is well-known for housing numerous ethnic groups, including Malay, Chinese, Indian, Kadazandusun, Iban, and others; the presence of these races inevitably left their imprints on this country. Following that, multiple languages are spoken in order for races to communicate with one another. Aside from the national language, known as Bahasa Malaysia, the people utilize Malaysia's second language which is English either to communicate or as a learning language tool. Apart from being taught in all Malaysian schools, it is actively promoted at all educational levels, from primary to tertiary (Mohd Nor et. al, 2019). It may be difficult or simple for certain people to pronounce English words especially growing up in Malaysia. Here, mother tongue influence has grown to be one of the most significant speaking issues that students face (Adickalam & Yunus, 2022). It could happen due to multiple reasons such as zero practice, lack of learning interest and the diversity of cultures in Malaysia.

Considering that the population is multi-ethnic, there is no standardized version of English accent in Malaysia. The possibility of mispronouncing an English word is high, which could lead to misunderstanding for the native speaker; thus, Malaysian English speakers need to have decent pronunciation. Pronunciation errors are also common among Malaysian English speakers for majority of them speak a variety of English dialects collectively referred to as Malaysian English (MaE). Those who lack phonetics skills may struggle to learn standard English pronunciation, which is why practising how to properly pronounce a word correctly is much required to ensure one's intelligibility and communicative competence.

According to Seah and Salehuddin (2022), word knowledge is essential at all stages of language learning due to its key role in verbal communication. As one grows older, the transitional phase of learning and adapting a new language becomes a challenge as it might

conflict with their mother tongue. Language learners come from an array of backgrounds, which influences their English pronunciation. They may have low self-esteem as a result of peer pressure. Learners who have passed puberty could find it challenging to learn new words and terms (Seah & Salehuddin, 2022). In light of the ongoing COVID-19 outbreak in Malaysia, every learning institution has been forced to switch entirely to online instruction; as a result, the new speakers had less practise and verbal interactions with others. According to Darcy (2018), proper and standard pronunciation training enhances communication skills by fostering the growth of concise speaking talents, plus speaking with greater clarity facilitates understanding and requires less effort from listeners. This means that interaction and communication in English are crucial in honing pronunciation.

Following that, there are numerous language learning methods that one can practise on their own, including playing games. Educational games can influence students' perspectives and motivation. According to Ibrahim et al (2022), as cited in Hedri (2017), puzzles can assist individuals to learn English since they aid with vocabulary development, independent learning, confidence, and the recognition of letters and words. Crossword puzzles are one of the games that require players to think critically and in depth throughout to solve them. Learning through games allows modification of study habits and techniques while also increasing interest in the course material. (Motade & Deshpande, 2022, as cited in Crossman, 1983). A phonetics-based collection of crossword puzzles has been compiled to enable intermediate second language English speakers gradually revise and strengthen their phonetics skills. UiTM Melaka Part 5 English for Professional Communication (LG) students were chosen for this project considering that they have been exposed to phonetics since the first semester and are presumed to be familiar with pronunciation, in particular with regard to phonetics symbols.

4.3. Project Objective / Purpose

This project aims to provide students of English for Professional Communication (LG) with opportunities to gradually improve their phonetic spelling skills and pronunciation. In addition to playing the crossword puzzles, they will be able to refine their own pronunciation, especially of complex words. The objectives are as follow:

1. To publish 10 Instagram posts on phonetics lessons.
2. To post around 10-20 Instagram stories of phonetics related content.
3. To come up with an e-book prototype.

4.4. Entrepreneurial Opportunities

This online crossword puzzle collection is meant to accommodate those who have enrolled in English for Professional Communication (LG) to enhance their phonetic memories since they lack exercise opportunities. It differs from other exercise puzzles in that it has been tailored to a smaller group of targeted students and also serves as phonetics revision activities for them. Based on the needs of LG students at UiTM Melaka, UiTM could perceive this e-book as an opportunity for these students to improve and master their pronunciation skills; consequently, purchase the finalised product as practice and intervention for its students to ace the pronunciation subject. *Crossfunetics* can be converted into hardcopy if there is a high demand from UiTM. Overall, the marketability of this product appears to be promising.

2. METHODOLOGY

2.1 Project Phases

Phase One: Planning and Scheduling

Crossfunetics was originally intended to be printed as a book and distributed to UiTM Melaka English for Professional Communication (LG) students before the decision was revised to produce a more defined project outcome. The Gantt Chart timeline is used to manage this project for 14 weeks. Amidst that, a variety of topics were chosen for the crossword puzzles, but they were narrowed down to Sociolinguistics, Presentation Skills, Creative Writing, and New Media Language pertinently for Part 4 and Part 5 students.

Phase Two: Creating Contents

The puzzles are based on shared content slides by lecturers of the respective subjects. They are curated as general questions after the subject topic. Next, is to design them using suitable template sizing since they will be promoted on a specific online platform.

Phase Three: Promoting

This project is advertised and promoted on Instagram, given that it is free and its contents can be accessed by all including the target audience, whom in return may spread contents of a fun way to revise phonetics. The said promotional method will likely become a new trend for learning phonetics to those who are interested.

2.2 Scheduling (Gantt Chart)

GANTT CHART

CROSSFUNETICS - PHONETICS CROSSWORD

WEEK	PLAN	W 1	W 2	W 3	W 4	W 5	W 6	W 7	W 8	W 9	W 10	W 11	W 12	W 13	W 14
	Proposed at least 1 project to supervisor	✓													
	Consult with supervisor to collect feedback	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓				
	Decided on methods used for the promotional purposes.		✓												
	Decide on fixed final year project			✓											
	Create a storyboard of the posts for the social media account to make the plan clearer.				✓										
	Identify and refine proposal details.					✓									
	Execution of the proposal.						✓								

Design poster and correct based on feedback.						✓									
Identify unforeseen outcomes (reviews).							✓								
Prototype submission (e-book version + blog + Instagram posts and stories)								✓							
Make amendments from feedback collected.								✓	✓	✓					
List out feedback from Instagram posts from multiple people											✓				
Submission of project portfolio												✓			
Preparation for poster presentation.												✓			
Poster presentation.													✓	✓	

3. RESULTS AND DISCUSSION

An online questionnaire was developed using Google Form as the instrument for collecting and analysing data from respondents. The results are displayed in Table 1 below.

NO	QUESTIONS	RESULTS		
		YES	MAYBE	NO
1.	Do you think it's difficult to solve the puzzle?	41.6%	41.6%	16.7%
2.	Do you enjoy playing the puzzles?	75%	16.7%	8.3%
3.	Please rate the puzzle difficulty level	EASY	MEDIUM	HARD
		0%	66.7%	33.3%
4.	Should the questions focus more on one topic or multiple?	MULTIPLE	ONLY ONE	
		41.7%	58.3%	

Table 1

Based on the survey, 41.7% of players regard *Crossfunetics* as challenging. While 41.7% of them had mixed feelings about its level of difficulty, the remaining 16.7% thought the puzzles

were not hard to solve. It is also shown that 75% of players enjoyed the puzzles, although 16.7% of them were uncertain of their preference and 8.3% declared to disfavour it.

66.7% of respondents rated the crossword puzzles as having a 'Medium' level of difficulty. The remainder (33.3%) rated it as tough and none view it as 'Easy' (0%). This is feasible since the puzzles can be tricky to solve for those who have not read or reviewed the subjects. 41.7% of respondents opted the puzzles to cover multiple topics, while 58.3% preferred that they cover only one.

Despite more than half of respondents chose a single theme, topic variation is necessary to build motivation and engagement for entertainment value. This is substantial as the puzzles serve as revision for learners to test their English phonetic spelling and pronunciation skills as they self-study. The project feedback offers pointers and insight on how *Crossfunetics* can be further developed.

4. LIMITATION

Even though this project initiative has the potential to take off in the field of phonetics education, it is not without constraints. Users are unable to submit completed crossword puzzles for immediate feedback; instead, they must manually check their answers using the QR codes provided, which will direct them to a blog containing answer keys. Future studies could further propel this game into the digital realm of language learning or one similar to Scrabble, with additional levels added to pique consumer interest.

5. CONCLUSION

From the above analysis and discussion of data, students can benefit from the medium of games in learning English phonetics, where they are more actively engaged. *Crossfunetics* offers plenty of chances for them to notice errors and correct their phonetic spellings and utterances, which will be beneficial for their future endeavours when proper pronunciation is required. Hence, it is suggested that educators integrate games into lesson plans to enable learners stay engaged and positive while adopting new learning strategies to assist with the subject at hand.

ACKNOWLEDGEMENT

The author wishes to express her gratitude and heartfelt appreciation to everyone who has contributed to the completion of *Crossfunetics*. Special thanks to the supervisor, Madam Anasztasia Natasha Muhamad Ramlan, who guided the author throughout this project until the end with numerous ideas and amendments for both puzzles as well as the extended abstract.
