Firstly, my special thanks go to my supervisor, MOHD NORAFIZAL BIN ABD AZIZ (Ts.) for guiding me along this research. Special appreciation also goes to my beloved parent, ABD HAEIZ BIN AHMAD and SADIHA BINTI MUHAMMAD SALIH who has given me so many supports along these studies. Finally, I would like to give my gratitude to all my dearest friends who has help and teach me in along these studies.

ABSTRACT

Basic problem that business especially for small business had to face is redundant problem. This problem can lead the business to face more trouble and problem in the future. This project will present The Web-based Inventory management system for Sarina's Boutique. This system is designed to perform inventory management specifically for small business. Small business usually does not need any detail feature. If Sarina boutique can manage their inventory properly, it is enough for them. The result show that by developing the system that compatible with their level right now, Sarina boutique can improve their inventory management a lot better that Sarina boutique use similar system that Sarina boutique need to pay monthly even though Sarina boutique do not fully use its features. Sarina boutique also can save a lot of money by changing their process from traditional to digital method. The system will be helpful for the business as long the system is compatible and do not add another burden to the business to run smoothly.
