## ACKNOWLEDGMENT

First and foremost, all praises to Allah SWT Almighty for the guidance and blessing in completing this project and brighten my direction on this journey.

Next, I would like to extend my deepest appreciation to my advisor, Madam Flicia Rimin for giving me the opportunity to be her advisee to assist us in completing the final year project along with my coursemate. Not to forget for Sir Jasman Tuyon as my second examiner for the feedback and comment towards my study of this research. Through this semester, they always give me the guidance and give valuable comment on my progress in completing my report. Without their help, this research would not be complete.

Last but not least, I would like to be thankful for the willingness, support, encouragement and help from my family and friends in doing this research. Their endless support has helped me a lot in doing my final year project. Syukur Alhamdulillah.

## ABSTRACT

The purpose of this study is to examine the role of informational content of trading activity (trading volume and open interest) on the commodity futures price in Malaysian Futures Exchange. Besides that, this study also interested to measure the two way relationship between the predictors variable and dependent variable. The sample include in this study is daily data covering from 1st of June 2016 until 28<sup>th</sup> of April 2017. The data collected from Bursa Malaysia Derivative Berhad; commodity futures specifically for Crude Palm Oil Futures contract. This thesis is employing Ordinary Least Square (OLS) with Breusch-Godfrey test instead using the simple OLS method. To test the two way relationships, Granger Causality Effect being utilized. The findings from this study are; both trading volume and open interest does positively significant in the determination of futures commodity price. While for the Granger result, there is no bidirectional relationship found in this thesis. These result are recommended to the technician analyst, investors as well as for farmers who interest involve in futures market.

Keywords: Commodity Futures, Open interest, Trading volume, OLS with BG-LM test, Granger Causality Effect
