## **ACKNOWLEDGEMENTS**

My deepest appreciation and hottest warmest gratitude to each one of those individuals who aided amid my paper. I would never have possessed the capacity to complete without the direction, advices and support. Their kindness is much indeed appreciated.

In the first place, I would like to record my appreciation to my supervisor, Madam Flicia Rimin for the valuable assistance, advices and guidance. Additionally, she has taken the pain to go through our thesis and make correction as needed. Her astounding persistence and direction have given an amazing climate in doing my thesis. I am genuinely admired the time and exertion from you. To wrap things up, I want to extend my gratitude to family for their support and everyone who was important to make successful realization to my dissertation.

## TABLE OF CONTENT

ACKNOWLEDGEMENT	iv
LIST OF TABLES AND FIGURES	vii
GLOSSARY	viii
ABSTRACT	ix
<b>CHAPTER 1 INTRODUCTION</b>	
1.1 Background of Study	1-4
1.2 Problem Statement	4-5
1.3 Research Objective	5
1.4 Scope of Study	5-6
1.5 Significance of Study	6
1.6 Limitation of Study	7
1.7 Chapter Summary	7-8
<b>CHAPTER 2 LITERATURE REVIEW</b>	
2.1 Introduction	9
2.2 The measurement of a banking institution performance	9-10
2.3 The relationship between bank sizes towards Banking Institution performance	11
2.4 The relationship between capital ratio towards Banking Institution performance	12-13
2.5 The relationship between liquidity towards Banking Institution performance	13
2.6 The effect of Global Financial Crisis towards Asian	14
2.7 The effect of Global Financial Crisis towards Financial Institution	14-15
2.8 The effect of Global Financial Crisis towards Malaysian Economy	15
2.9 The impact of Global Financial Crisis towards Malaysian Banking Institutions	15-16
2.10 Chapter Summary	16-17
<b>CHAPTER 3 DATA AND METHODOLOGY</b>	
3.1 Introduction	18
3.2 Research Design	18
3.3 Data Collection	18-19
3.4 Research Population and Sample	19-20
3.5 Theoretical Framework	20
3.6 Empirical Model	20-21
3.7 Data Analysis and Hypotheses Testing	22
3.7.1 The Process of Panel Data Technique	22-23
3.7.1.1 The Fixed Effect model	23
3.7.1.2 The Random Effect Model	23-24

3.7.2 The Panel Unit Root Test	24-25
3.7.3 Diagnostic Testing	25-26
3.7.4 Breusch and Pagan Lagrange Multiplier (LM) Test	26
3.7.5 Hausman Test	26-27
3.7.6 Pearson Correlation	27
3.8 Hypothesis Testing	27-28
3.9 Measurement Variable	28-29
3.10 Flow of Research Methodology	30
3.11 Chapter Summary	31
<b>CHAPTER 4 FINDINGS</b>	
4.1 Introduction	32
4.2 Descriptive Analysis	32-33
4.3 Stationary Test	34
4.4 Diagnostic Test	34-36
4.5 Breusch and Pagan Lagrange Multiplier (LM) Test	36-37
4.6 Hausman Specification Test	37-38
4.7 Fixed Effect Random	38-39
4.8 Research Hypothesis Testing	39-40
4.10 Chapter Summary	40
<b>CHAPTER 5 CONCLUSION AND RECOMMENDATION</b>	41-43
REFERENCES	44-45
APPENDICES	46-73

## **ABSTRACT**

This paper attempts to investigate the consequences of Global Financial Crisis towards the performances of financial institution in Malaysia. For this purpose, 34 financial institutions comprise licensed institution namely commercial banks, investment banks, Islamic banks, and international Islamic banks which licensed and supervised by Bank Negara Malaysia (BNM) were used and tested using panel data regression model as tool embedded in the STATA Software over the period of 2009 until 2014 in relation to Global Financial Crisis. The profitability ratio of Return on Asset (ROA) is used as a financial indicator to measure Malaysian bank's performances in relation to the effect of Global Financial Crisis in 2008. Based on this paper, the result of size of bank that measured by total asset has no relation towards bank profitability at all while the result capital ratio shows that the relation is significantly and positively influences the bank profitability. On the other hand, liquidity is significantly influence the bank profitability but in negative headings which means that the increase in current ratio will resulted decrease in return on asset (ROA) and vice versa. For future studies, it is recommended that more sample size and determinant factors can be included in determining the effect on bank profitability.
