ABSTRACT

This study investigates the correlation of Malaysia's economy-tourism business with internet and e-commerce, and their influence on tourists' satisfaction. This research study explores travellers' adoption of e-travel services in the context of Malaysian travel services. The key objective is to identify the profile of e-commerce competitive advantages, Internet technology, electronic travel service quality (E-QUAL), and tourist experience on Malaysian tourist satisfaction adoption for e-travel services. Since Malaysia is benefiting of its internet technology and e-travel services then tourist destination in Malaysia could be one of the famous destinations in South-East Asia. This research aims to assess the effects of Internet technology acceptance, e-commerce competitive advantages, e-travel services, and tourist experience on tourist satisfaction in Malaysia. It focuses on the relationship between two individual variables of e-commerce with four items (product, brand, service, and price) and internet technology with two dimensions (usefulness and easiness) on tourist satisfaction (TS). Furthermore, two mediating variables, E-QUAL with five items (information quality, security, website functionality, customer relationship and responsiveness), and tourist experience (TEX) with three dimensions (arousal, education and escapist) are analysed. The findings indicated influence of E-COM to E-QUAL as well as internet technology acceptance on E-QUAL. Furthermore, the product and price significantly effect on TS. The effective internet information leads to higher tourist satisfaction with the selected holiday destinations, and the key contributor is the perceived easiness. The E-QUAL significantly effects tourist experience, and tourist experience to tourist satisfaction. Finally, the key contributor to tourism experience on TS was arousal. For this current study, the data were collected through self-administered survey questionnaire. Descriptive statistics, reliability and validity analysis, multiple regression analysis were used in analysing the data on the effects of internet technology, E-travel services and tourist experience on tourist satisfaction. Two statistics software, SPSS and Smart PLS were used to examine the data.

ACKNOWLEDGEMENT

All praise to Allah S.W.T for giving me the strength and patience to complete this dissertation. This publication is the result of the support, encouragement, and beliefs of several people that are very dear to me. Without their help, I could not have finished this project. It is difficult to express my gratitude, but I will try to convey my feelings and thanks in this short space to those that meant so much to me.

To Associate Prof. Dr. Artinah Zainal (as my main supervisor) and Associate Prof. Dr. Salleh Mohd Radzi (as my co-supervisor), I would like to thank both of you from the bottom of my heart for the conversation, thorough guidance and suggestion throughout the process of completing this thesis. Thank you for the many hours of meticulously scrutinizing and giving attention to details. Your insights and skill has led me to produce a much higher quality result, and I am very grateful for that. Your persistent and untiring motivation has kept me moving and determined to complete my PhD journey. Both of you make things possible for me when I thought it was not impossible. I cannot thank you enough.

The appreciation also goes to Associate Prof. Dr. Norzuwana Sumarjan, former Head of Post Graduate Studies for her valuable insights, helpful suggestions, professionalism and understanding throughout my educational journey in the faculty of Hotel and Tourism, UiTM, Malaysia.

Also I would like to thank Dr. Nadia Hanin Nazlan for her kind assistance and advice for the statistic parts of this current study. The completion of this thesis would not be possible without her assistance and encouragement.

A special dedication goes to my dearest and beloved parents, for their unconditional love and support, encouragement and prayers for my educational success. This piece of victory and triumph is dedicated to both of you, Alhamdulillah. To my siblings; two brothers and a sister thank you for being there when I needed assistance and support. You all are great. My expression of appreciations also goes to a few special friends.

Thank You ALL.

May Allah Bless ALL OF YOU.
