ABSTRACT

The importance of this study is focused on the relationships among export, inflation and investments towards economic growth (GDP) in ASEAN-5 Countries are using International Financial Statistics (IMF) from 1980 to 2010 which is consist of 31 years-lengths. The variables for this study are the economic growth in ASEAN-5 Countries is a gross domestic product as a dependent variable and export, inflation and investment as an independent variable. The test of unit root using Augmented Dickey Fuller (ADF) is to test the stationary of the data. The Ordinary Least Square (OLS) which is by using Multiple Regression Analysis sare used in this study in order to determine the relationship of three macroeconomic variables which is export, inflation and investment towards GDP growth in Asean-5 countries.

ACKNOWLEDGEMENT

I am grateful and thankful to Allah S.W.T in giving me strength to completing this thesis on time without many barriers of health and many more. I also heartily thankful to my family that always pray and wishes for the best to me, and also supporting me in financial and advices, Moreover, thanks to my supervisor, Madam Rainah Ginsad, whose guidance me, encourage and support from the initial to the final enabled me to develop an understanding of the subject and hopefully can accept my precious work with better mark, and thanks for all the help.. I'm also thankful to Dr. Imbarine Bin Bujang because teach me on how to doing a research from the beginning until this part. It is also a pleasure to thank those who made this thesis possible especially to all my friends that always give different opinion on finishing this thesis, and lastly to the future researcher that choose this thesis as one of their references.
