Abstract

This prospective study was about the perception of the increasing retirement age among UiTM Pahang lecturers. It compared the factor that contributed to the increasing retirement age. There are 30 lecturers who become the respondent for our questionnaires. We use graph and table to show the finding from the questionnaires. The type of this research was the descriptive research because it focuses on events that occur in the present.

This research was to find whether there was the significant relationship between gender and the increasing the retirement age. From the findings, it shows that the genders were influence the respondents to choose whether late or early of retirement age.

ACKNOWLEDGEMENT

First, we would like to thank to Allah SWT because with His mercy we are able to complete our project paper to fulfill requirements of the Issues in Administrative Management (OSM 651) course during our final year. We could not have written this project without the assistance and guidance from Pn. Hj. Jahjaiton Binti Arsad, who not only served as our supervisor but also encouraged and help us throughout our academic program. Beside that, we would like to give our big appreciation and thank you to Tuan Haji Abdul Razak Bin Said, lecturer of Issues in Administrative Management and also not forgotten to Encik Saharani, statistic lecturer, who had guide and help us during our research. Other than that, we also would like to give our appreciation to Miss Rahimah Binti Wahab, who had evaluated our questionnaires. For our family, friends and others who had help us in order to complete this research and not forgotten Uitm lecturers who help by answering our questionnaires. Lastly thank you to our group members for their cooperation and committed in completing this research paper. Thank you.
