## **ACKNOWLEDGEMENT**

Many people have contributed to this project for making suggestions and advices based on their experiences as a lecturer or a student. I would like to thank the following persons for their comments and suggestions: Puan Siti Rafidah Muhamat Dawam as Supervisor of this project, Puan Azlin Dahlan, Puan Norizan Mohamed and to all the person that I not mentioned their name here for support me during develop this project.

It has been a great pleasure working with all of you. Lastly, I would to thank my beloved family for their love, patience and understanding. With the help from all of you, I cannot finish this project and report properly. From the bottom of my heart, thank you very much.

# **CHAPTER 1**

## **Introduction**

I have successfully completed my practical training in TM Pulau Pinang for duration of full four working months which is from 3<sup>rd</sup> July 2006 until 20<sup>th</sup> October 2006.

I was located in Data Service Unit (DSU) TM Seberang Jaya for four full working months. I have learned on the data services provided by DSU such as DA, DQ, and DG. Other than that, I have been taught about circuit types and Network Terminating Unit used by data service group. In this unit, I have practiced on circuit testing using Network Management System (NMS) and dummy circuits. I also assisted the field team on the installation and restoration of Data Services. By the end of the training; I was given a task to make a new installation for low speed circuit, and prepared a layout of the configuration. Upon the completion of my training in this unit, I was able to understand and differentiate between all the three services provided by data services group and understand the overall process in installation and restoration of network equipment by DSU.

# CONTENTS

CHAPTER		PAGE
	Acknowledgement	i
Chapter 1	Introduction	1
	Student Background	2
	Scope Of Training	3
Chapter 2	Company Background	4
	Data Service Unit (DSU)	5
Chapter 3	Basic Principles And Theories	7
	3.0 Introduction	7
	3.1 Leased Line	7
	3.1.1 Analogue Leased Line	8
	3.1.2 Data Service (DA) And Digitaline I (DG)	9
	3.1.3 Digitaline II (DQ)	10
	3.2 The Charges For Digitaline II Leased Line	12
Chapter 4	Type Of Network Termination (NT)	13
	4.1 DQ Low Speed Services	13
	4.1.1 MD72 Marconi	13
	4.1.2 MAT6D Marconi	14
	4.2 DQ High Speed Services	14
	4.3 V.35 Physical Loopback	16
Chapter 5	Network	17
	5.1 Primary network	17
	5.1.1 Main Distribution Frame (MDF)	17

	5.1.2 Cabinet	18
	5.2 Secondary Network	19
	5.2.1 Distribution Point (DP)	20
	5.3 Fiber Optic Transmission System	20
	5.4 Advantages Of Fiber Optic Transmission System	22
Chapter 6	Troubleshoot And Testing	23
	6.1 Troubleshooting	23
	6.1.1 Low Speed	23
	6.1.2 High Speed	25
	6.2 Digitaline II Circuit testing	31
Chapter 7	Cable, Internal Wiring And Installation	32
	7.0 Introduction	32
	7.1 Details of Copper and Fiber Termination	33
	7.2 Area Of Responsibility	34
	7.3 NTU Arrangement	34
Chapter 8	Conclusion And Recommendation	35
	8.1 Conclusion	35
	8.2 Discussion And Recommendation	36
Appendices	Chapter2 – Chapter8
