ABSTRACT

The use of wireless networks has progressively increased over the past years and it has become the most important medium for communication and cost efficiently. With the rapid development of mobile communication, mobile telephone users are expecting higher network capacity and good connection quality especially at the cell-edges, were users experiencing bad signal coverage because of small cell capacity and cell coverage. To support high volume data services and applications it is required a peak data rate. Long Term Evaluation-Advanced (LTE-A) has been created by 3rd Generation Partnership Project (3GPP) where the improvement of the cell edges capacity as well as cell coverage are the expectation provided. The objective of this research is to place relay node (RN) at poor signal area in LTE-A cellular network to improve the coverage extension region. This research is divided into two parts. First is drive test measurement by using Nemo Outdoor equipment in order to get real signal performance. Second is deploy relay nodes by using MATLAB software at low signal area as obtained by the measurement result. The analysis results indicate an improvement in signal strength and increase successful handover performance and hence improving the network capacity for the deployment of the relay nodes.

TABLE OF CONTENTS

AUTHOR'S DECLARATION	ii
ABSTRACT.....	iii
ACKNOWLEDGEMENT	iv
TABLE OF CONTENTS.....	v
LIST OF FIGURES	vii
LIST OF TABLES.....	viii
LIST OF ABBREVIATIONS	ix
CHAPTER ONE	1
INTRODUCTION	
1.1 RESEARCH BACKGROUND	1
1.2 PROBLEM STATEMENT	6
1.3 OBJECTIVES	8
1.4 SCOPES OF STUDY	8
1.5 SIGNIFICANCE OF STUDY	9
1.6 THESIS STRUCTURE	9
CHAPTER TWO	11
LITERATURE REVIEW	
2.1 INTRODUCTION.....	11
2.2 OVERVIEW OF LTE PARAMETERS	11
2.3 LITERATURE REVIEW	8
2.4 SUMMARY	21
CHAPTER THREE	23
RESEARCH METHODOLOGY	
3.1 INTRODUCTION.....	23
3.2 DRIVE TEST MEASUREMENT	25
3.3 MEASUREMENT TOOL	19
3.3.1 NEMO OUTDOOR.....	20
3.3.2 SAMSUNG GALAXY S5	21
3.3.3 FIELD EXPERIMENT	22
3.4 SIMULATION	23
3.4.2 CELL ARCHITECTURE.....	26
3.5 SUMMARY	26
CHAPTER FOUR.....	35
RESULTS AND DISCUSSION	

4.1	DATA MEASUREMENT.....	35
4.2	SIMULATION.....	43
4.3	SUMMARY	
	CHAPTER FIVE	47
	CONCLUSION AND FUTURE WORKS	
5.0	CONCLUSION	47
5.0	RECOMMENDATION FOR FUTURE WORK	47
