FSKM Directory System

Amir Irsyad bin Roslan

**Thesis submitted in fulfilment of the requirements for
Bachelor of Computer Sciences (Hons.) Multimedia
Computing
Faculty of Computer and Mathematical Sciences**

DECEMBER 2016

ACKNOWLEDGEMENT

Alhamdulillah praises and thanks to Allah because of His Almighty and His utmost blessings, I was able to finish this research within the time duration given. Firstly, my special thanks to my supervisor, Norasiah binti Mohammad for her guidance, encouragement, advice, ideas, and support, throughout the duration of this project.

Special appreciation also goes to my beloved parents and my family members, especially my dearest mother and father for their incomparable love, continuous moral support, counseling and guidance in ensuring that as learning individual to always do my best and to reap success in spite of all the shortcomings and challenges.

Last but not least, I would like to express my sincere gratitude to those who had been involved in contributing their time, effort and support in making this research successful. I am most fortunate to have the advice and guidance of many talented people, whose knowledge have enhanced this project in so many ways. Thank you.

ABSTRACT

FSKM Directory Map System is a project that is use to help user to reach their destination in the Faculty of Computer and Mathematical Sciences in an effective way, the main target audience of this project are students from Faculty of Computer and Mathematical Sciences. Previously, the user either students or visitors always take long time to search for rooms and offices at the faculty. They also found that there is too much information at the directory map board that is placed at the foyer. The development of this project is based on waterfall model by using 2D and 3D modeling. The significant of the study are the user can get the best route to the destination and save the user time to reach their destination. 8 respondents have been selected for user satisfaction test that consists of two lecturers and six students from Faculty of Computer and Mathematical Sciences. Majority of the respondents agreed that this system can replace the current system that currently being used at the faculty.

TABLE OF CONTENTS

CONTENT	PAGE
SUPERVISOR APPROVAL	ii
STUDENT DECLARATION	iii
ACKNOWLEDGEMENT	iv
ABSTRACT	v
TABLE OF CONTENTS	vi
LIST OF FIGURES	x
LIST OF TABLES	xii

CHAPTER ONE: INTRODUCTION

1.1	Project Background	1
1.2	Problem Statement	2
1.3	Project Objective	3
1.4	Project Scope	3
1.5	Project Significance	4
1.6	Conclusion	4

CHAPTER TWO: LITERATURE REVIEW

2.0	Introduction	5
2.1	Web based System	5
	2.1.1 Web Browser	6
	2.1.2 Web Server	7
	2.1.3 Database Server	7
2.2	Modelling	7
	2.2.1 2D Modelling	8
	2.2.2 3D Modelling	8
	2.2.3 Comparison between 2D and 3D Modelling	9

2.3	Virtual Reality	11
2.3.1	Types of Virtual Reality	11
2.3.1.1	Windows on World (WoW)	12
2.3.1.1	Video Mapping	12
2.3.1.1	Immersive System	13
2.3.1.1	Telepresence	13
2.3.1.1	Fish Tank Virtual Reality	14
2.3.2	Differences between Virtual Reality and Augmented Reality	14
2.4	Related Work	15
2.4.1	Map Based Directory System	15
2.4.1.1	Background	15
2.4.1.1	Invention	15
2.4.2	Shortest Path	16
2.5	Conclusion	17

CHAPTER THREE: PROJECT METHODOLOGY

3.0	Introduction	18
3.1	Flow of Project	18
3.2	Waterfall Model Phases	21
3.2.1	Requirement Planning	24
3.2.2	Data Collection	25
3.2.3	Design	26
3.2.4	System Development	27
3.2.5	System Analysis and Testing	28
3.2.6	Documentation	28
3.3	Software and Hardware Requirement	29
3.4	Scheduling	29
3.4.1	Gantt Chart	30
3.4.2	Milestone	31
3.5	Conclusion	32
