## **Abstract**

This research is to identify the relationship between the factors that influence studying at rural area and studentt academic performance. This study is limited to the respondents at rural area and limited to IPTA students in Jengka. This study is limited to Bachelor Office Management's students in UiTMJengka, Pahang and this study only focusing the factors influence studying at rural area and students' academic performance. There have been three factors that influence students' academic performance which are Technology, Facilities and Transportation. So, there is relationship between the factors influence studying a rural area towards student's academic performance. Technology is the factor that most influence students' academic performance and the lowest factor that affect students' academic performance among students in UiTMJengka Pahang is facilities. Government, Educational Institution and for the future research recommend that, technology, facilities and transportation need to be developed well in order to improve students' academic performance.

### **Acknowledgement**

**Alhamdulillah, first of all I would like to thanks to Allah that gives healthy to me so that, I can finish my academic project very well to fulfill the requirements of the Research Methods (OSM662). I would like to thanks to Madam ZarirahbintiZamaksari the person who in charge for this academic project as my supervisor.**

**I would also want to thanks to Dr. Hajah Mas Anombinti Abdul Rashid, as coordinator for subject OSM662 that give a lot of information to us to complete our research. Then, a lot of thanks to Dr. Mohd Noor Azman bin Osman that had proofread this research. I am blessed to have both parents who have been the source of inspiration and give a lot of support to me. Last but not least, I also like to thanks to my group project and to all my friends that are given opinion and give full support to me until I can finish this research.**
