## ACKNOWLEDGEMENT / PREFACE

This study has been prepared by Norsiah Binti Santong, the final year student for BBA (Hons) Marketing in UITM Sabah. This paper is part of the task that needs to be completed before graduating this year.

I would like to express my sincere appreciation to my colleagues in Telekom Malaysia Kota Kinabalu who assisted me on distributing this survey forms to the people in every district for the public to fill up. I would also like to thank The Assistant General Manager of Sabah for her permission and support for this study.

I also would like to express my special thanks to Associate Professor Zainuddin Osman, the advisor for MKT660 for his guidance and advices. Without his valuable guidance, I will not be able to complete this paper. Not forgetting as everyone in the public and private sectors alike that gave their time during the interview sessions. Without their support this report could not have been prepared.

# TABLE OF CONTENTS

Title Page	i
Declaration of Original Work	ii
Letter of Submission	iii
Acknowledgement / Preface	iv
List of Table	v
List of Figure/Graph/Diagrams/Attachment	vi
List of Abbreviations/Glossary	vii
List of Definitions of Terms	ix
Abstract	xi
CHAPTER 1.....	4
INTRODUCTION.....	4
1.0 Background of the study.....	4
1.2 Statement of the problem .....	6
1.3 The Sub-problems .....	6
1.4 The Objectives of Study.....	7
1.5 Research Questions .....	7
1.6 The Limitation of Study .....	8
CHAPTER 2.....	9
CONTENTS AND LITERATURE SURVEY.....	9
2.1 VSAT GROWTH IN ASIA PACIFIC.....	9
2.2 The capabilities of VSAT.....	10
2.2.1 VSAT value over cable.....	11
2.2.2 A blast of broadband.....	12
2.2.3 A dash of VPN.....	12
2.2.4 Service differentiator .....	12
2.3 VSAT in Telekom Malaysia .....	13
2.4 The impotency of Public Awareness.....	14
2.4.1 Definition and the Concept of Awareness.....	14
2.5 The objectives of promoting Customer Awareness .....	16
CHAPTER 3.....	18

METHODOLOGY .....	18
3.1    Sampling Method.....	18
3.2    Data Collection Method .....	18
3.3    Secondary Data.....	18
CHAPTER 4.....	20
DATA ANALAYSIS & FINDINGS.....	20
4.1    Locations of respondents.....	20
4.2    Business ownership .....	21
4.3    The Number of Respondents who ever heard about TMVSAT.....	22
4.4    Source of information for the first hear of TMVSAT .....	24
4.5    The source of further information that the respondents got on TMVSAT.....	25
4.6    The Respondents current subscription status on TMVSAT .....	27
4.6    The Respondents Perceptions of TMVSAT .....	29
4.7    The Respondent's Interest on getting more information on TMVSAT.....	30
4.8    Reason of respondents' interest on getting more information about TMVSAT .....	32
4.9    The most preferable way on getting more information about TMVSAT .....	34
4.10   The respondents level of interest to subscribe to TMVSAT in the future. ....	35
4.11   TMVSAT performance rating by the current users .....	37
4.12   The advantages of TMVSAT in the current user's perspective. ....	38
4.13   The Disadvantages of TMVSAT .....	39
4.14   Overall performance in terms of product pricing .....	40
4.15   Overall Rating by the current users in terms of service quality. ....	41
4.16   The Overall rating by the current users in terms of customer service quality .....	42
4.17   Overall rating by the current users in terms of service delivery performance.....	43
4.18   Overall rating by the current users in terms of Service Availability.....	44
4.19   The respondents Intention to recommend TMVSAT service to others.....	45
CHAPTER 5.....	47
CONCLUSIONS.....	47
5.1    Conclusions by case to case basis.....	47
5.1.0    The Overall level of awareness of TMVSAT.....	47
5.1.1    Level of TMVSAT awareness based on location.....	47
5.1.2    the most potential location need more information about TMVSAT .....	49
5.1.3    Preferable way for getting more information.....	50
5.1.4    Location that have greater potential of subscribing to TMVSAT .....	51
5.2    The Opportunity of TMVSAT in terms of credibility.....	52
5.3    The threat towards to the TMVSAT growth.....	53

## ABSTRACT

More and more product development projects involve geographically distributed groups of developers. One major problem among the members of such groups is the long term lack of awareness of the activities in remote sites. In this paper we discuss the importance of awareness in distributed product development projects. I am zooming down the product to TMVSAT a satellite product provided by Telekom Malaysia as a product that involved in this paper.

TMVSAT is “**Telekom Malaysia Very Small Aperture Terminal**” and the term refers to any fixed satellite terminal that is used to provide interactive or receive-only communications. VSATs are used for a wide variety of telecommunications applications, including corporate networks, rural telecom, distance learning, telemedicine, disaster recovery, board communications, transportable "fly-away" systems, and much more. VSATs are becoming increasingly popular, because they are a single, flexible communications platform that can be installed quickly and cost effectively to provide telecom solutions for consumers, governments and corporations. They have been in use for more than 10 years and, with more than 500,000 systems operating in more than 120 countries, VSATs are a mature and proven technology.

TMVSAT networks provide rapid, reliable satellite transmission of data, voice, and video to an unlimited number of geographically dispersed sites or from these sites to headquarters. User with a satellite network, there are no routers and no switches - nothing between the user and the source of the information, except the sky. There are no physical limitations in terms of geography or distance to make deployment difficult or too expensive. And since VSAT (Very Small Aperture Terminal) satellite communication systems often provide a complete end-to-end infrastructure, they can be completely independent from Telco's. Furthermore, VSATs have a reliability rate and
