## **ACKNOWLEDGEMENT**

Initially, I wanted to wish our blessing and thanked Allah SWT for giving me with mental and physical as well as other positive attitude in a process to complete my final project paper. I want to take this opportunity to express my sincere gratitude to those who has assisted in completing this final project paper.

Firstly, I would like to thank my advisor, Madam Siti Zaitun binti Saddam for her support, guidance, advices, and immense knowledge starting from the confirmation of project title until the completion of this project paper. Her constructive comments and suggestion has helped me a lot in the process of completing my project paper.

Next, I would like to thank my parents, Mohd Sani bin Abu Mansor and Anisah binti Amin. Without their continuous supports, I might not be able to finish my final project paper. All their helps in terms of moral support and financial support have helped me until my project paper is done.

Last but not least, further appreciation to those who has assisted direct or indirectly during the completion of my final project paper. Genuine thanks to all my friends for their moral support and ideas that make me able to submit my project paper on time.

Thank You.

## **ABSTRACT**

The rise of household debt in Malaysia has caused consternation since it has almost reached 88.4% of total GDP at the end of 2016. The level of household debt is deemed to be at worrying stage as it may trigger another financial crisis. The purpose of this study is to examine the macroeconomics factors influencing household debt in Malaysia via time series data. This study employs the Ordinary Least Square (OLS) method and the macroeconomic variables used consist of GDP, interest rate and house price. The data for all variables are taken from the period of quarter one 2008 to quarter one 2017 via Data Stream. The results display that the GDP and house price show a positive significant relationship to household debt in Malaysia. Meanwhile, interest rate is found to have negative significant relationship on the rise of household debt.
