## **ACKNOWLEDGEMENT**

First and foremost, I would like to express my gratitude to Allah S.W.T for giving me the guidance, power and blessings that I have been given in this mission to complete.

I would like to express my appreciation to Sir Amirudin Bin Mohd Nor for supporting and advise me throughout the completion of my project paper. His feedback and observations helped me finish this paper on the project. He made a substantial contribution to this project and supported me with his timely response.

I would also like to express my deepest gratitude to all those who are helped in the completion of this research paper in one way or another. Besides that, I would like to thank all my friends for their moral support and also for completing this project paper during the period that I pursued. Last but not least, I thank my beloved parents most sincerely for their unwavering support and heartfelt blessing.

Thank you.

## **ABSTRACT**

Nowadays, there is a lot of bankruptcy cases happened in the whole countries and they have become widespread. The bankruptcy will lead to a serious problem for the governments and its countries. Thus, since Malaysia's are rising bankruptcy trend. It will effectively become a stumbling block for Malaysia to become a "high-income country" in 2020. The purposes of this study are to investigate the impact of house price index, lending or interest rate and unemployment rate towards number of bankruptcies in Malaysia. This study used 32 quarterly data for observations which is from quarter 1(2011) until quarter 4 (2018). The method of this study is Multiple Linear Regressions. This study used E-Views software in order to run all the data collected to test and analyses the results for discussions. In this study, the results show that just two independent variables are significant while one independent variable is insignificant.
