4.10.2.2 Section C Negative Statement.....	51
4.10.3.1 Section D Positive Statement .....	52

## ACKNOWLEDGEMENT

Alhamdulillah. Thanks to Allah S.W.T, whom with his willing giving we the opportunity to complete the assignment. This assignment was prepared to the subject Academic Project (OSM 662) that we taken in the semester six in the Universiti Teknologi Mara, Jengka Pahang.

Firstly, I was heartly thankful to my advisor Mr Azeman bin Majid that have encourage, guidance and support me. I also would like to express my deepest thanks to him because he always gives me valuable information, suggestion and opinion to complete the assignment. I are truly grateful to him continual support and cooperation, as being prepared to assist us all along the completion of the project. Last but not least, thanks to my family, friends and my member group that was doing this project and sharing ideas that are, Hanif Bin Sulaiman and ‘Aadila binti Abd Razak. They were helpful that when we combined and discussed together, we had this task done.

Thank you.

Hanif bin Sulaiman  
‘Aadila binti Abd Razak

## **ABSTRACT**

**Purpose:** The purpose of this study is to determine the factor of depression that can contribute the job depression among government servant in Pejabat Pelajaran Daerah Jerantut, Pahang that can caused by the certain employees in this organization.

**Methodology:** A mixed method adopted data such as the method were taken on the literature review and journal article. A method and data we interpreted based on the table; figures and diagram .We also identify and explained the research by using the sampling plan. The instrument also used to generate data and explain in detail about the sampling frame and sampling technique. For example, unit of analysis, data collection procedure, instrument, validity of instrument and plan for data analysis.

**Findings:** For this research, tables and charts were used to represent the findings and data that have been analyzed. The data that was collected will be analyzed by using Statistical Package for Social Sciences (SPSS) Version 20.0 system.

**Conclusion:** This study was conducted to identify the most chosen alternatives by employees in responding to their job depression. Mostly, we focused on the entire employee, especially to the government officer who has to face the management, administration, structure and procedure.
