ACKNOWLEDGMENT

First of all, we would like to extend our utmost appreciation to our creator, Allah SWT the Almighty for giving us the opportunity to complete this research paper in which to fulfil the requirement for Bachelor Business Administration (Hons) Finance. We truly believe that without His will and blessings, it is impossible for us to complete this research paper within the given time frame.

I would like to thank my advisor, Miss Amizatul Hawariah binti Awang for her support, advices and guidance from the start until the completion of the thesis. Her comments and suggestion to improve my thesis really helped me a lot. Also my second Advisor PM Rahimah Shawkataly willingly to help and give useful advices.

Next, I would like to express my warm thanks to my parents, Mohamad Zin bin Saripin and Kartinah binti Ahmad because their supports during my hard times. Because of them, I able to finish my final project paper smooth and efficiently. All their helps in terms of moral and financial support have helped me until my project paper is done.

Last but not least, further appreciation to those who has assisted direct or indirectly during the completion of my final project paper. Genuine thanks to my friend for their moral support and ideas that make me able to submit my project paper on time.

Thank You.

ABSTRACT

The aim of this study is to investigate the relationship between Gross Domestic Product (GDP), Energy Prices and Food Import to the Malaysia food price. The study used Multiple Linear Regression in order to find the relationship among those variables. The quarterly data of all variable is collected from 1st Quarter 2010 until 4th Quarter 2017. From the result, it reveals that Gross Domestic Product (GDP) and Energy Price have a significant positive relationship towards Malaysia Food Price. The result indicate that Food Import are negatively towards Malaysia Food Price. But, Food Import is not significant toward Malaysia Food Price. These results further our understanding of the relationship between the Malaysia Food Price and should be useful for policy maker, government, public and future researcher.

Keywords: food price, Malaysia, GDP, energy prices, food import
