Dear Madam,

SUBMISSION OF PROJECT PAPER (FIN672)

Attached is the project paper title "FACTORS INFLUENCING PROFITABILITY OF CONSTRUCTION COMPANIES IN MALAYSIA" to fulfil the requirement as needed by the Faculty of Business Management, Universiti Teknologi MARA.

Thank you.

Yours sincerely,

.....

MUHAMMAD 'IFWAT BIN KAMALUDDIN
2015140245
BACHELOR OF BUSINESS ADMINISTRATION (HONS) FINANCE

ACKNOWLEDGEMENT

This research paper becomes reality with the full support of many individuals in so many different ways. I would like to sincerely thank to all of them.

First of all, I would like to give an appreciation to Allah S.W.T who granted me health and long life, without which I could not finished this research paper. With his help, my dream turn into reality. This research has been an honest and dedicated to make the analysis on profitability as authentic as it could. And I earnestly hope there will be useful and workable information besides knowledge to any person reading it.

I am really fortunate that, I have kind-hearted advisor who is Mrs Salwani Binti Affandi for her strict guidance, encouragement, valuable opinion, criticism and constant monitoring throughout this research work. She's taught me about fundamental aspects that I need to incur in research. Her effort to support me until finish this research work when hope was nearly lost is really unforgettable. I also would like to express my gratitude to Dr Zuriyati Ahmad who was my second examiner who inchargely to give comments, advices and corrections of my research paper.

Lastly, I'm grateful to my parents who have been my mentors and motivator and urged myself to do better. I am also hugely indebted to my colleagues who put their faith in me and have been directly or indirectly involved in making this research become successful. I cannot thank them enough for their friendship, caring, support and trust.

Abstract

As we can see at Malaysia Statistic trend there are shown volatility in the profitability of Construction Company for the recent year. The volatility in the profitability because of so many reason. Thus, the intention of this research was to determine the effect of current ratio, debt ratio, size of company and tangibility towards the volatility of the profitability of the Construction Company in Malaysia. Data was collected from DataStream from the year of 2007 to 2016. The data gain from Department of Statistic Malaysia, unpublished research paper and published research paper. The data were analyse by using Least Square analysis and panel data analysis. It was found that the change of debt ratio, and the tangibility give significance impact to the volatility of the profitability of Construction Company. The debt ratio and tangibility shows significance negatively relationship. The result show current ratio and size of company has insignificance relationship to the profitability. The current ratio shows negative relationship while size show positive relationship. Thus, the company need to manage their debt and asset wisely and fully used of it to remain competence in market.
