ACKNOWLEDGEMENTS

In the name of Allah s.w.t, the Most Compassionate, the Most Merciful the Most Gracious. All praise goes to Allah s.w.t. for giving me strength, patience and making things possible for me to complete this project paper according to the time given.

First of all, I would like to express my deepest gratitude to my advisor, Madam Nurul Izzat Binti Kamaruddin for her continuous valuable and useful guidance. Her kindness in sharing expertise, experience and knowledge in preparing project paper. Her support and favourable comments all the way through the completion of this project paper.

I would like to take this opportunity to express my thankfulness to my beloved parents for their support and guidance not only in completing the project paper, but also in finishing my study.

Finally, my appreciation goes to all my friend for sharing information and guidance, contribute directly and indirectly in completing this project paper. May Allah s.w.t shower His blessing upon all.

ABSTRACT

This study used capital structure focus on leverage as an independent variables namely Long-term debt (LTD), total debt (TD) and Return on Asset (ROA) as firm Performance. This study is to investigate the relationship of capital structure focus on leverage towards the performance of the firm and which of the leverage contribute the most towards firm performance. The sample of this study taken yearly from 2006 to 2012. The findings shows that there is negative insignificant relationship between Long-Term Debt and Firm Performance. Next, there is a negative significant relationship between Total Debt towards Firm Performance. Panel data consist of secondary data gathered Malaysia firm have been used as study which employed Panel Regression Random Effect Model. Researcher use Econometric view 9 (E-Views 9) as medium to analyse and interpret descriptive, normality and regression. Lastly, researcher have come out with the conclusion and recommendation about the research that can be done in the further.
