## ABSTRACT

The purpose of this study is to examine the barrier factors that might hinder the adoption of e-commerce by SMEs in Terengganu. The methodology used in this study was questionnaire survey whereby it was sent to 74 SMEs in Terengganu who were listed under a special government assistance programme known as Bumiputera Enterprise Enhancement Programme (BEEP). The data gathered was analyzed using SPSS. Analysis of the data obtained found that factors that become barriers to the e-commerce adoption by the SMEs in Terengganu which were initially identified through previous literatures as Complexity, Cost, Security and Suitability to the business. Correlation analysis showed that there is a strong negative significant relationship between e-commerce adoption and suitability to the business. This implied that most SMEs have overcome other barriers particularly those that are technological and financial in nature. Therefore, it can be concluded that both SMEs and policy makers need to deal only with suitability barrier to increase level of e-commerce adoption.

Keywords: E-commerce, barriers, hinder and suitability

## ACKNOWLEDGEMENTS

In the name of Allah, the Most Gracious and Most Merciful

Praise be to the Almighty Allah for giving us health, strength, courage, and patience to complete the Applied Business Research (ABR795) subject entitled “Barriers to the E-commerce Adoption by SMEs in Terengganu”.

This research would not have been possible without the assistances and support of many people and institutions.

Firstly, we would like to convey our special thank to our advisor, Associate Professor Dr. Mazidah Puteh for her invaluable guidance and advice towards the completion of this research. We are very much indebted to her for her patience in helping us to overcome challenges and obstacles during the course of working on this research paper.

We would also like to extend our thanks to all those lecturers from UiTM who have shared their knowledge and provided guidance and assistance during the course of doing our EMBA.

Furthermore, special thank we extended to the staff of UiTM online library for doing such an excellent job in setting up such a complete resource centre. The online library is extremely important for student like us as we could access all the necessary information without having to be physically present at the library.

Last but not least, we would like to express our heartfelt gratitude to our family, friends and respondents for the information, support and cooperation. Without them, we might not have the motivation to complete our research course.

Thank you very much.

Farid, Haizum & Kartini
