ACKNOWLEDGEMENT

In the name of Allah, the Most Compassionate, the Most Merciful

Praise be to Allah S.W.T. the Al-Mighty for giving me the strength and patience to complete this study successfully within the period given. This is a great blessing indeed.

Many people have contributed in the creation and completion of this project paper. Firstly, I wish to express my tremendous of appreciation to my lecturer, Madam Nur Hidayah Binti Zaini for her compassion in providing valuable guidance, comments, support and advice along the period of the preparation of this project paper.

Furthermore, I would like to give special thanks to Melaka International College of Science and Technology (MICOST) that have allowed me to distribute my questionnaire in order to collect the data at their company.

Moreover, I also want to dedicate my appreciation to my family for their warm, continuous encouragement as well as their kind understanding. Without them, I will not very passionate in doing this project paper.

I would like to thank to my friends for their support, sharing information, and critique. Without them, this project paper couldn't have been completed. Finally, I would like to extend this appreciation to all person that have directly and indirectly contribute their valuable assistant, cooperation and support in the completion of this project paper.

ABSTRACT

The research objective is to examine whether non-monetary which include the recognition, job enrichment and promotion opportunities have a positive relationship on employee performance. The target respondent is staffed who are working at Melaka International College of Science and Technology (Micost). The quantitative research approach was adopted using five points Likert scale questionnaire and the data collection managed to achieve a percentage of 100 per cent which is 103 questionnaires returned which were derived from a total of 103 questionnaires. The collected data are being analysed using Statistical Package for Social Science (SPSS) software. This research engaged convenience sampling technique. Descriptive analysis, reliability analysis, Pearson correlation analysis and multiple regression will be used to analyse the collected data. The result shows that promotion opportunities have a positive and significant relationship with employee performance. Future researchers are recommended to approached different type of respondent and test on different independent variables.
