ABSTRACT

SKS is one of the subsidiary under MARA Holding Sdn. Bhd. has been providing express transport services linking Seremban and Kuala Lumpur for more than 12 years. The services are catered by 35 buses which totally own by SKS.

Improper fleet utilisation is a common problem in a public transport undertakings and SKS is no exception during operating express transport services to public. The study conducted, during practical training is to identify the problem of fleet utilisation in SKS fleets, in terms of passenger's occupancy.

Therefore several period of time which low occupancy would occurs, can be identify as well as the factors which caused the problem.

Therefore several proposal and recommendations can be formulated to overcome those problems, when possible or at least minimise them.

Finally I hope that my recommandations towards the problems will be accepted and implemented by Sistem Kenderaan Seremban - Kuala Lumpur Sd. Bhd. in the course of it's operation.
