ACKNOWLEDGMENT

First and foremost, I would like to express my utmost gratitude to the Almighty, God for giving me the strength and willpower to complete this thesis. Without His willingness this thesis could not be materialised.

I am very grateful to the organizational members of Petronas Dagangan Berhad, especially Encik Haznan Hussein of Human Resource Department, for accepting me as a family member and having rendered so much assistance during the six-month practical attachment.

I am also very grateful to the management and staff of Supply and Operation Department, especially Encik Miza Mohamad who had persistently guided and assisted me in gathering relevant data for the study and thesis preparation.

My heartiest thanks to Encik Yusoff Sulaiman, BBA(Transport)/CIT Course Tutor; Puan Rosena and Puan Norminsham, Senior Transport Lecturers; whose advice and guidance could never be forgotten. Your dedication to the students of MARA Institute of Technology is invaluable.

To my parents, parents-in-law and families, a million thanks for your support and encouragement. To my beloved husband, your love and devotion have made me stronger in persevering this challenging life.

Last but not least, I wish to thank all my friends and those who had given their moral support in materialising this thesis.

ABSTRACT

Privatisation and the steps towards it, for instance corporatisation, is intended to make an organisation places greater emphasis on commercial criteria and to pursue the profit objective more strongly. In attempting to pursue profit, Petronas Dagangan Berhad (PDB) proposed to fully privatised its roadtanker operations, which engaged in the distribution of PETRONAS bulk petroleum products, in Malaysia.

The roadtanker operations will be privatised to a few selected private hauliers or a Consortium or Joint-Venture (JV) Company. The whole activities of PDB roadtanker from the driver upwards are the interested areas of privatisation.

In this study, attempt was made to analyse the operational and cost efficiency of privatising the bulk LPG roadtanker operations in the Central Region. A financial analysis was conducted to further support the full privatisation of PDB roadtanker operations. Based on the financial savings projected within the next five years, it was found that PDB would benefit from this privatisation by enjoying an average savings before tax amounting to RM 0.7 million per annum.

The interests of the affected roadtanker drivers upon the privatisation will not be neglected. They are retrained or given an attractive retrenchment package or even join the Consortium or JV Company to remain in employment.
