ACKNOWLEDGEMENT

Alhamdulillah, all praise and gratitude to Allah S.W.T for giving us strength and patience in completing the research paper “The Factors that affect the Commercial banks in Malaysia” within the specified period.

First and foremost, I would like to take this opportunity to express my gratitude to my Supervisor, Madam Zuraida Binti Mohamad for giving me guidance, comments and advises since the beginning of this project until the end. I also strongly appreciated Madam Salwani Affendi for teaching me on how to run the data using Stata software. Not to forget, I would like to say my greatest appreciation to my beloved family members who never stop giving me moral support and also to my friends who always beside me during good and bad times and willing to help in assisting me to complete this project. Last but not least, sincere thankful to those who help me either directly or indirectly towards the completion on this Final Year Project report. Thank you.

ABSTRACT

The aim of this study is to investigate the effect of bank-specific and macroeconomics factors on commercial bank's profitability in Malaysia during 2005-2014. This study focus on the 20 commercial banks includes local and foreign banks. The data of this study is analysed by using panel data Analysis (Fixed Effect Model).The result shows liquidity, bank size and inflation are significant influence to the bank's profitability while gross domestic product, credit risks and interests rate spread are not significant towards banks' profitability.
