ACKNOWLEDGEMENTS

The great f praise is to Allah S.W.T for giving me the opportunity, time and effort to complete in this independent study report. Then, I really hope that it will contribute to the continuously knowledge in the future.

I want to express my deep appreciation to my supervisor, En Hamid bin Othman that had gave me a good supervision, valuable of guidance and support to complete this study.

I am deeply debted to all FTMSK, Uitm Shah Alam for their outstanding and contribution for me done this study.

I am really appreciate the role that all lectures of the Bachelor program especially Pn Salwani Jaafar, as my Head of Program for her effort, dedication and support.

I owe a great debt of gratitude to m mum, Pn Zalihah bte Hamad for her prays, advices and support along the way in my life and this researches development. Also, a great appreciation to my father, Hashim bin Ibrahim for his prays and support.

Lastly, I portray my appreciation to all individuals that helps and contributes from the beginning of this researches development till the end of this researches, directly or indirectly.

ABSTRACT

Exploitation by attackers whose have breached the network security of some of the world's most vulnerable institutions and organization had become increased every year including in FTMSK web server, University Technology of MARA (UiTM).

Within this type of attention, network security has gone from the as an extra services to the main services in a relatively short period in FTMSK web server. The main purpose is to mitigate security risk and assure that their FTMSK digital assets, especially FTMSK websites and mail server, are in safe and digital environment is become a better condition to the staff and the students.

Auditing activities can help to identify the weakness and vulnerabilities in the FTMSK web server at FTMSK to prevent he attacks against it by the hackers or crackers. This idea is, find, identify and fix these weakness or vulnerabi;lities before the attackers use them against FTMSK computer network system.
