

**A STUDY ON THE RELATIONSHIP BETWEEN TECHNOLOGY
ACCEPTANCE AND I-LEARN AMONG THE STUDENTS OF FACULTY OF
OFFICE MANAGEMENT AND TECHNOLOGY IN UiTM JENGA PAHANG**

Prepared for:

EN. ARIFI RIDZUAN

Prepared by:

**NOR ADDEYLA BINTI JAFFAR
ZURIYANA BINTI MISWAN**

**BACHELOR DEGREE IN OFFICE SYSTEMS MANAGEMENT
UNIVERSITI TEKNOLOGI MARA (UiTM)**

JANUARY 2012

AKNOWLEDGEMENT

Alhamdulillah, all praises to Allah the almighty, the most merciful and most benevolent for giving us the strength and patience in preparing and completing this research paper.

Our special gratitude goes to Sir Arifi who performs as advisor for this research paper and our courses lecturer Sir Tn. Hj. Abd Razak bin Said. They have given a strong faith for us to conduct this research by delivering valuable knowledge and guidance to ensure this research complete in a good manner.

We would like to express for our gratitude to our family, and also to all my friends who shared their precious experiences and knowledge. Without their support and patience, my research would have been a hard journey.

Last but not least, we would like to thank to all academic staffs of Universiti Institut Teknologi Mara, Jengka who had guided us during our course study and everyone that involve directly or indirectly. Without them, this research cannot be complete until the end. Thank you.

CHAPTER 1

INTRODUCTION

The advent of the technologies have revolutionized the way people live, communicate, work, and even learn. In fact, the revolution has affecting the way educational institutions deliver the education. The traditional method of delivering education has changed to several methods either in form of web-based learning, blended learning, online learning and even the e-learning. Those are requiring the technology literate to enable the students to adapt to the changing method of education. The phenomenon happen lead to the study with objective of technology acceptance among the BM232 students as well as the relationship between technology acceptance and I-Learn System that implemented in UiTM Pahang. This chapter will expatriate the main objectives of the study in which how it would benefits the audience.

Background of the Study

The development of the Internet extremely affects the education. O'Malley (as cited in Lim, 2008) said that most of the education will use the internet as one of their teaching method in the future. One of the teaching methods is e-learning. According to Jefferies & Hussain (1998) the use of electronic learning (e-learning) as a medium of instruction in distance learning is also becoming increasingly important in Malaysia and worldwide. It is also supported by the Volery & Lord (2000). The main purpose of e-learning is to reduce the time people need to learn by providing specialized up-to-date information (Zabunov and Ivanov, 2003). E-learning offers
