## **EXECUTIVE SUMMARY**

This report is about my experience during my internship training under one of the units in UiTM Perlis, named Research, Industry, Community, Alumni, Entrepreneurship & Network (RICAEN). This company offers all faculty members in research grant applications, publications, intellectual properties, consultation services as well as commercialization, develop new linkages and strengthen existing partnerships with industry, communities, alumni and other universities. This company is divided into five different units, and I will be put under the Publication and Excellence Unit incharge by my supervisor, Dr. Nurul Ain Binti Mohd Zaki. As the coordinator of the Publication and Excellence Unit, she gave me a lot of opportunities by joining her with many programs related to this unit. The programs have taught me a lot of skills and gained new knowledge as it involves many lecturers and people outside the company. Additionally, as a member in this unit, I am responsible to assist lecturers in registering publication results in the Publication Repository Information System Management (PRISMA) system, managing and publishing Jurnal Intelek (UiTM Perlis journal) according to the planned period organizing workshops related to publishing and writing, collaborate to coordinate the publication of seminar proceedings and updating information on the PJIM&A website. That is, honestly I can conclude that this company is such an amazing company that they give an intern a chance to engage with the community and expose us with real work life and culture, instead of being given a task and just doing office work.

### **3.0 COMPANY'S PROFILE**

#### **3.1 BACKGROUND OF PJIM&A UITM PERLIS**

Figure 2: Company's Background

Headed by the Deputy Rector (Research & Industrial Linkages), the RICAEN division serves and helps all faculty members in research grant applications, publications, intellectual properties, consultation services as well as commercialization. The objective of Industry, Community, and Alumni Network is to develop new linkages and strengthen existing partnerships with industries, community, alumni and other universities. Finally, the Entrepreneurship Unit aims at promoting continuous real-life entrepreneurship experience to the faculty members and developing entrepreneurship skills among students. This unit is actively involved in planning and conducting entrepreneurial related programs.

### **3.2 PJIM&A MISSION**

A company's business, who it serves, what it does, goals and strategy for achieving those goals are all defined in the mission statement. There are several mission statements that need to be achieved in this company that include strengthening UiTM's scholarship and innovation capabilities through quality services. Next, establish a good, harmonious and effective relationship between UiTM Perlis and industry, government, private sector and community. Besides, distribute and provide research training, consultation and writing to UiTM Perlis residents. Moreover, focus on strategic relationships with stakeholders that will bring positive results to UiTM Perlis and the stakeholders. Lastly, to ensure the relationship between industry, government, private sector and community will bring a positive impact on UiTM Perlis's image.

### **PJIM&A VISSION**

A vision statement is a business document that outlines the organization's goals for the now and the future. A company's mission, strategic strategy, culture and basic values must all be in line with its vision. (Ray, S, 2021). RICAEN's vision statement is to become a world-class researcher, innovation, consulting, and publication management center and to establish a relationship between UiTM Perlis and industry, government, private sector and society for mutual benefit.

### **3.3 OBJECTIVES OF PJIM&A**

Whether it's in a year or a decade, company objectives are the outcomes and goals you expect to attain. The basis for the remainder of your planning, activities and responses is laid by creating a list of company goals. The objectives of RICAEN are to manage, coordinate and provide services related to research, consulting, and publishing. Besides, helping the development of new fields in line with campus program priorities. Moreover, disseminate and provide research, consultation and writing training to uitm Perlis residents. Additionally, ensuring that the culture of innovation, research, consultation and publication is always fertile among uitm Perlis citizens. Furthermore, help strengthen the quality of teaching and learning of

uitm perlis academic staff. Then, strengthen the marketability of prospective uitm perlis graduates. Lastly, assisting uitm perlis in mobilizing activities that generate campus income.

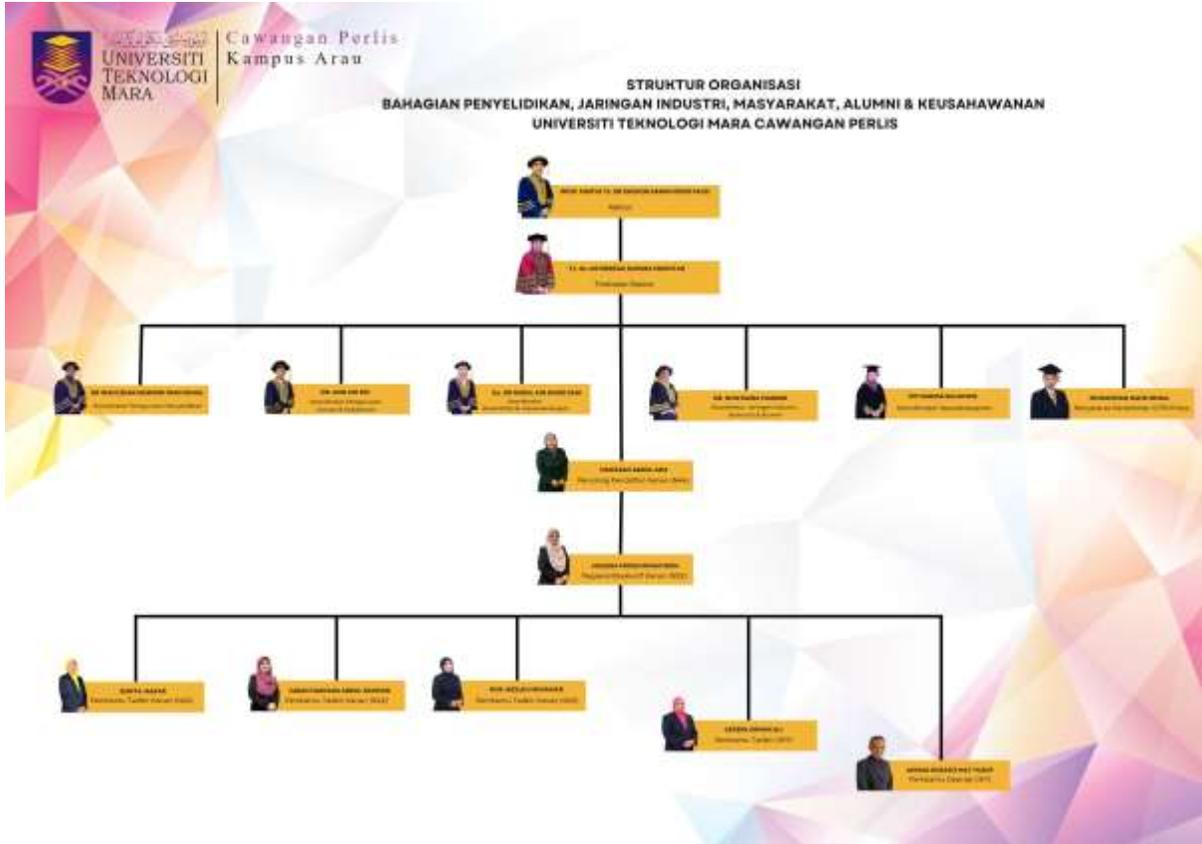

Figure 5: Organizational Chart

### 3.5 UNITS UNDER RICAEN

#### 3.5.1 Research Management Unit

The research management unit is responsible for coordinating and disseminating information regarding research-related activities in UiTM Perlis. This unit acts as Coordinating and monitoring researcher research projects (General Grants (National)-FRGS, ERGS, e-Science, RAGS, RACE, Excellence Fund, International Grants). Encourage lecturers to engage in high-profile research activities such as LRGS and PRGS. Mobilize Research Interest Group (RIG) research activities that assist in the establishment of the CoE. Encourage lecturers to participate in research-related workshops. Organizing programs related to innovation either at the national or international level. Briefing and training staff who will represent UiTM Perlis at the innovation competition. Help coordinate the commercialization of research/innovation products with RIBU, UiTM Shah Alam. Organize workshops and consultation awareness campaigns.

Figure 6: Research Management Programs

### 3.5.2 Publishing & Excellence Unit

The publication and excellence is responsible for coordinating and disseminating information regarding publication related activities in UiTM Perlis. The unit is also responsible for managing Research Interests Group (RIG) in UiTM Cawangan Perlis. This unit acts as Assist lecturers in registering publication results in the Publication Repository Information System Management (PRISMA) system. Manage and publish Jurnal Intelek (UiTM Perlis journal) according to the planned period. Organize workshops related to publishing and writing. Collaborate to coordinate the publication of seminar proceedings. Updating information on the PJIM&A website.

Figure 7: Publishing & Excellence Programs

### 3.5.3 Innovation Management & Expertise Unit

The Innovation Management and Expertise unit is responsible for coordinating and disseminating information regarding innovation-related activities in UiTM Perlis. The unit is also responsible for managing UiTM Perlis Experts as well as promoting research products commercialization.

Figure 8: Innovation Management Programs

### 3.5.4 Industry, Community & Alumni Network (ICAN) Unit

The ICAN unit is responsible for coordinating community projects as well as industrial-linkage activities within UiTM Cawangan Perlis. This unit acts as Promote student mobility activities within and outside the country by providing information related to related institutions/companies.

Helping stakeholders at UiTM Perlis to create strategic collaboration and industry networks between government and private institutions through MoU or MoA. Coordinating with the HEA and HEP to run programs that help improve the marketability of graduates. As a data collection and management center for UiTM Perlis alumni. Planning and implementing programs with UiTM Perlis Alumni. Coordinating Alumni programs with Hal Ehwal Akademik (HEA) and Hal Ehwal Pelajar (HEP). Responsible for managing and monitoring the performance of the Knowledge Transfer Program (KTP) grant.

The figure displays two promotional materials for ICAN programs. The left poster is for a direct debit campaign titled 'ANDA INGIN MENYUMBANG KEPADA UiTM PERLIS'. It features the logos of Universiti Teknologi MARA and Pejabat Bendahari Perlis. The text asks 'BAGAIMANA NAK BUAT?' and provides instructions: 'POTONGAN BULANAN SECARA AUTOMATIK MELALUI 'DIRECT DEBIT' TERUS KE AKAUN UNIVERSITI TEKNOLOGI MARA (UiTM) PERLIS'. It includes a QR code and a URL: 'ATAU LAYARI https://ifacipay.my/go/uitmperlis'. Logos for Bank Islam and InfaqPay are also present. The right poster is for the 'TABUNG ALUMNI PRIHATIN RM5 'KELANGSUNGAN PENGAJIAN MAHASISWA' UiTM CAWANGAN PERLIS'. It features the hashtag #alumniUITMprihatin and a QR code. Below the QR code, it lists the organizing committee: 'Pengurusan Pengendalian Kewangan Tabung Ini Akan Dijayakan Secara Kolaborasi Bersama Pusat Jaringan Alumni (AJNC), Pejabat Jaringan Industri, Komuniti dan Alumni (ICAN) Dengan Kolaborasi Pejabat Bendahari, UiTM, Pejabat Pembangunan Infrastruktur dan Infostruktur (PPI) UiTM, dan Fakulti/Kampus UiTM.' The objectives are: '1. Memberi peluang kepada alumni UiTM menyumbang kepada pembangunan pembelajaran pelajar-pelajar UiTM' and '2. Membantu menampung pemberian insentif kepada para pelajar UiTM'.

Figure 9: ICAN Programs

### 3.5.5 Malaysian Academy of SME & Entrepreneurship Development (MASMED)

The Malaysian Academy of SME and Entrepreneurship Development (MASMED) is responsible for coordinating entrepreneurship activities among students and staff in UiTM Cawangan Perlis. This unit encourages entrepreneurial activities among students and staff of UiTM Perlis as well as the local community through MASMED by providing entrepreneurial training. Giving UiTM Perlis students the opportunity to venture into entrepreneurship through the Student Entrepreneur Kiosk Program. Encourage students to attend entrepreneurship seminars organized by UiTM and external institutions. Provide TOT training to entrepreneurship lecturers for the purpose of strengthening the teaching and learning of the ENT course. Holding entrepreneurship conferences at the national and international level for the purpose of encouraging the involvement of UiTM Perlis lecturers in the field of entrepreneurship research and entrepreneurial innovation.

---	---

Table 4: Staff's Roles and Responsibilities

## **4.0 TRAINING'S REFLECTION**

### **4.1 DURATION**

Date: 1 MAC 2023 until 15 AUGUST 2023

Working Day: 5 Days

Time: 8 AM until 5 PM

### **4.2 STUDENT'S REFLECTION**

As a student of Human Resources Management in UiTM Perlis, I have done my industrial training at one of the important departments in my University which is called Research, Industry, Community, Alumni, Entrepreneurship & Network (RICAEN). I started my industrial training from 1 Mac 2023 until 15 August 2023 which is six months. Those six months were very memorable and fantastic for me. A lot of skills and knowledge has been taught for me in terms of handling a program, being a moderator of a publication event and related program. As a degree student in UiTM Perlis, I am an introverted person who does not like joining any program or activities that involve a lot of people. Now, I can see myself as a different person as I love joining many programmes involving lecturers and Vip guests. From now on, I love challenging tasks as it may increase my confidence level as well as improve my communication skills.

Besides, one of the company's backbone here is staff. Without them, all programmes and UiTM events cannot be held. From my observations, I can see that all the staff here bring a positive and good vibe for internship students like me. They have respect, good attitude and are friendly people. Those attitudes make students willing to learn more about the company. Besides, all staff and internship students are being placed in the same office which makes us have a very good relationship within staff and internship students. We share stories together while completing tasks and helping each other in order to handle a program from the beginning until the end. I can see all staff here are very hardworking as well because they are willing to work overtime in order to finish their job rather than extending that work to the next day.

Moreover, by attending and joining all programmes launched by this company, I gain more knowledge and new skills. One of the skills includes communication skills, problem solving skills, critical thinking skills, collaboration skills and many more. The soft talent of communication enables people to express their views. These abilities can aid people in communicating their ideas both orally and in writing. They may exchange ideas with others and express their opinions clearly if they have good communication skills. Students may collaborate with others and develop connections by using their communication abilities. Working here also taught me that teamwork is very important as we can get different ideas and opinions from other people. In a nutshell, teamwork can help work to be more efficient. This can result in increased production, lower costs, more profitability and a variety of other advantages. Nowadays, organizations around Malaysia demand high quality and teamwork candidates in order to produce high quality employees.

#### **4.3 JOB RESPONSIBILITIES AS AN INTERNSHIP STUDENT UNDER PUBLISHING AND EXCELLENCE UNITS**

- Distribute invitation letters to lecturers related to Research Interest Group (RIG) registration
- Checking list name of lecturers related to the Scopus and WoS
- Prepare paperwork related to Handholding programs
- Updating the new regulation of Article Publishing Fee Financing Service
- Be a moderator in several RICAEN event
- Prepare and handle Writing Series Program collaboration with abroad consultant
- Sorting database regarding publication article

#### **4.4 GAINS**

An internship is a fantastic way to learn more about a field or job you might be interested in. Typically, internships are organized through an educational counselor who may assist in matching you with a business that meets your professional objectives. You may decide if taking an internship is the best line of action for you by understanding the advantages of doing one.

INTRINSIC REWARD	EXTRINSIC REWARD
<p><input type="checkbox"/> <b>Coaching and Mentorship</b> Mastery of knowledge or a skill open to learn in vary department</p> <p><input type="checkbox"/> <b>Belonging</b> Cooperation with team members helps create a sense of community and makes employees feels like they belong</p> <p>Making daily noticeable task progress in private group with supervisor in order more easier for supervisor guide</p> <p><input type="checkbox"/> <b>Recognition</b> Letting employee be open in decision making (open-opinion)</p>	<p><input type="checkbox"/> <b>Hari Raya Reward</b> Staff and lecturer gives reward for internships students</p> <p>Being invited for all Hari Raya Event from all UiTM Department</p> <p><input type="checkbox"/> <b>Daily Food</b> Staff bring food for breakfast, lunch and tea time</p> <p><input type="checkbox"/> <b>Accommodation Provided</b></p> <p><input type="checkbox"/> <b>Team Activities</b> Joining staff for activities such as camping and potluck</p>

Table 5: Reward Gains

## **4.5 OBSERVATION**

### **4.5.1 CENTRALIZATION AND DECENTRALIZATION**

Decision-making is a process of choosing alternative actions to attain certain goals. Cornito, C. M. (2021). While doing my internship training at RICAEN, I can see that this company applied Centralization practice when it comes to decision making. The concentration of authority at the top level of an organization is referred to as centralization. It is the systematic and continuous reserving of authority at an organization's focal points. Lower-level managers play a restricted involvement in decision-making in a centralized organization. They just have to carry out the top-level commands and choices. For example, even though the staff are able to make decisions on a certain part, they still need to have the signature by the deputy rector for approval.

On the other side, decentralization refers to the distribution of authority within an organization. It refers to a systematic endeavor to transfer all authority save that which may be exerted at central locations to the lowest levels. It is the allocation of authority inside an organization. In a decentralized organization, top management has control over significant decisions, but middle and lower management have balanced authority.

## **5.0 SWOT ANALYSIS**

The SWOT analysis, which stands for strengths, weaknesses, opportunities, and threats, is a method used in corporate planning to evaluate how a firm stacks up against its rivals. Although Albert Humphrey is often credited with coming up with the plan in the 1960s, this claim is still up for debate. Teoli et al.,(2022)

<p style="text-align: center;"><b>STRENGTH</b></p> <ul style="list-style-type: none"><li>● <b>Good working environment</b></li><li>● <b>Able to conduct many event</b></li><li>● <b>High integrity in managing task</b></li><li>● <b>Good team work</b></li></ul>	<p style="text-align: center;"><b>WEAKNESS</b></p> <ul style="list-style-type: none"><li>● <b>Workload</b></li><li>● <b>Misuse internet connectivity</b></li><li>● <b>Low budget</b></li><li>● <b>Insufficient number of staff</b></li></ul>
<p style="text-align: center;"><b>OPPORTUNITIES</b></p> <ul style="list-style-type: none"><li>● <b>Establish relationship with abroad university</b></li><li>● <b>Generate income</b></li><li>● <b>Variety of technology's usage</b></li></ul>	<p style="text-align: center;"><b>THREAT</b></p> <ul style="list-style-type: none"><li>● <b>Lack of funds</b></li><li>● <b>Variety of cultures</b></li><li>● <b>Community issues</b></li><li>● <b>Alumni competition</b></li></ul>

### **5.0.1 RICAEN STRENGTH**

Strengths are intrinsic, advantageous characteristics of your business. These are things that you can influence. What effective business procedures, for instance? We need to know what resources we need including knowledge, education, contacts, talents and reputation of the team. Additionally, we need to understand what tangible assets we have, such as clients, tools, technology, money and patents. Finally, we must know what competitive advantages you possess over your rivals. Parsons, N (2021)

### **GOOD WORKING ENVIRONMENT**

Your attitude, drive, mental health and performance are all impacted by your work environment. Employees would not likely have the confidence or job satisfaction to speak up if they work in a drab office environment with unpleasant coworkers. The success of your business depends on you providing a favorable work atmosphere because of this. Working at RICAEN was very fun as all staff and even upper level management are friendly. We even eat at the same table and share problems during free time. All staff are hard working and willing to teach new intern students knowledge and skills on how to use systems and to do other things that are new for us. In order to complete a task, we help each other even from other departments so that we can complete the task within the time. If one department is having programs, other departments will be there on the field to help.

Good working environment is very important inside an organization in order to create successful teams and a positive environment. As a student, I can do my task without stress and burden. There are ways to improve the working environment including that the office should be cozy. According to Mike Canarelli, co-founder of WTM Digital, a tidy, appealing office may have a significant impact on interactions between employees and bosses. Even if the sun can't shine into your office, try to create a comfortable environment with functional furniture and a few extra conveniences. Freedman, M (2023)

## **ABLE TO CONDUCT MANY EVENT**

Plenty of companies are selecting profiles that can fill a number of positions, responsibilities and tasks. This means that multitasking is a behavior that is needed by a company but not everyone can do that. Mostly, events in UiTM Perlis will be handled by RICAEN. During my internship training there, I joined more than ten events involving lecturers, alumni and also the community. Even though RICAEN are having a deficit in the number of staff, they are still able to manage all programs given to them. With help from an internship student, we divided and delegated tasks to everyone so that preparation for the event can be completed within time. Usually, when it comes to the big event such as Anugerah Semarak Sanjung and I-IDEA, staff will work overtime until they settle the preparation of the upcoming event. A study published by the Association for Psychological Science (APS) concluded that regardless of whether people are actually handling several tasks or not, the mere fact that they perceive this activity as multitasking has a positive effect on their performance. Srna, S et al., (2018)

## **HIGH INTEGRITY IN MANAGING TASK**

Integrity entails being trustworthy and upholding high moral standards. Even when no one is looking, someone with integrity acts morally and honorably. All employees must have high integrity in the workplace because it is very important in creating successful teams. On my observation, RICAEN's staff are responsible for the actions and are trustworthy. If any problem occurs during programs, they are responsible and take action and try to solve the problems without disturbing the programs. This attitude should be applied in the future career as many organizations demand a high integrity person to be in their company. Furthermore, companies with integrity may retain valuable clients, lower staff churn, boost output, and make wise judgments. Additionally, honesty encourages workers to be forthright about their accomplishments and proactive when confronted with inquiries. Perry, E (2022). Besides, all staff here are open with us when it comes to work. They will remind us if anything is wrong and ask us to change the bad behavior so that it will not affect the company soon.

## **GOOD TEAM WORK**

One of the vital parts in an organization is teamwork. Teamwork is one of the requirements from all companies in order to choose candidates. It is because working in teams will produce better production and ideas as it comes from many perspectives from different people. RICAEN implements very good team work as all employees do their job in a group. As I said earlier, they can manage more than one event in one day because they know how to manage and delegate tasks. Any organization's ability to function effectively depends on teamwork. Employees may cooperate, develop their own abilities and give criticism without running afoul of the other team members thanks to teamwork. Because team members improve their talents, knowledge and skills by working in teams, teamwork is an essential business strategy because it improves the organization's performance and efficiency.

### **5.0.2 RICAEN WEAKNESSES**

Your weaknesses take away from your strengths in a bad way. You might need to work on these areas to be competitive. For the firm's shortcomings, we need to know what the company needs to be competitive, what procedures need to be improved, what physical assets, such as cash or equipment, are required, whether there are any team gaps and whether the company's location is appropriate for success.

## **WORKLOAD**

Besides strength, there are several weaknesses including workload in tasks. In most organizations, the variability in employee workload may be largely influenced by the departments to which they belong. But even within the same department, there is no guarantee that employee workload will balance. An employee's perception of workload balance or imbalance as a result of perceived discrepancies between his workload and that of other organizational members can cause disaffection Henry, et al., (2020). From my observation, I can say that staff in RICAEN have workloads as they do not have enough staff. One staff member needs to complete too many tasks in one day. Sometimes, they do not have enough time for a break. This means that RICAEN does not implement work life balance for their staff.

This may affect their emotion, energy and feelings as one person needs to have a break from doing jobs at least 5 to 10 minutes per hour.

### **MISUSE INTERNET CONNECTIVITY**

Access to the Internet among employees has become standard. The World Wide Web has been recognized as a crucial productivity tool for the majority of workers since it offers quick access to information and a platform for interoffice communication. All companies must provide internet connectivity for their employees in order to search for the internet during work. But, some employees misuse internet connectivity by searching content not related to tasks given. The misuse of the internet connectivity may affect low internet connection. When it comes to important matters, the internet will be slow and disturbing the work.

### **LOW BUDGET**

Besides, RICAEN has a lack of budget even though they need to handle many programs. This is not good actually for the company as all events handled by RICAEN have VIP guests from abroad. For instance, we need incentives to prepare for breakfast and lunch. Also, we also need to prepare gifts on behalf of UiTM to give for VIP guests. All of these things need money from this company. Sometimes, staff need to use their own pocket money to buy breakfast and gifts for our guests. This should not happen as some people may not have enough money to support such things.

### **INSUFFICIENT NUMBER OF STAFF**

Lastly, one of the weaknesses is insufficient staff. Insufficient staff refers to a lack of employees in an organization, which might cause that company's performance to decline. Making sure there is enough staff to complete the day-to-day tasks at your organization helps maintain productivity and workplace morale. Being short-staffed, also called being understaffed, can increase the work each employee completes and potentially affect your business. RICAEN only has five numbers of lower level staff that need to settle down all tasks given. The same person also needs to do other tasks such as handling programs and events. This may result in a decline in organizational performance. Organizational performance is defined as

an organization's actual output or outcomes as assessed against its expected outputs or goals and objectives.

### **5.0.3 RICAEN OPPORTUNITIES**

Opportunities are uncontrollable elements in your company environment that have a good chance of influencing your performance. There are a number of things you should consider, such as if the market is expanding and whether there are any trends that will drive consumers to buy more of what you are offering. We need to know are there any more future events that the firm might be able to use to expand and what impending regulatory changes may have a beneficial effect on your business. Lastly, if your firm is already up and running, how well do customers see you.

### **ESTABLISH RELATIONSHIP WITH ABROAD UNIVERSITY**

There are several opportunities that can be gained for RICAEN such as RICAEN can establish relationships with universities abroad. For example, RICAEN's latest event called I-IDEA. This event includes one important collaboration which is signing an MOU with other universities including Thailand and Indonesia. This kind of relationship is very healthy for the company as we will have a variety of cultures and values. Besides, companies also can get more support and funds from the government as companies need to collaborate with other universities in the future.

When people come to our university, we can introduce our company products such as products made from harum manis. This product will go further into the nation one day.

### **GENERATE INCOME**

Next, we have the opportunity to generate income where MASMED usually handles several business programs. MASMED are responsible for conducting many events from inside and outside the company. From this event, the company can automatically generate more income that can be as a company saving. For example, MASMED will collect the rental from the merchants at their respective booths.

## **VARIETY OF TECHNOLOGY USAGE**

Lastly, RICAEN also has a variety of new technology usage in order to complete tasks. For example, research management units (RMU) have created new systems in order to key in form from the researcher. These systems make things faster as before this, staff under this unit using manual technique. They filled out the form one by one using human energy that made things be a little bit slow. So, by applying this new system, the researchers can fill the form on their own and the form will automatically appear in the system.

### **5.0.4 RICAEN THREAT**

Threats are outside forces over which you have no control. If they do happen, you might want to think about creating backup strategies for handling them. It concerns future rivals that could enter your market and if your suppliers will always be able to provide the raw materials you require at fair pricing. In addition, shifting customer behavior might have a negative effect on the business, and there may be market trends that pose a risk.

## **LACK OF FUNDS**

However, RICAEN also has threats which challenge the company. For instance, lack of funds from other organizations and governments. Lack of funds is defined as a present lack of funding required to sustain existing activities. Inability to obtain money will limit the company's ability to buy assets and resources required for expansion. Inadequate money may affect the capacity to cover day-to-day operations. Rent, payroll and insurance are the things that cost money on a continuous basis. A business starting fund can provide the financing needed to develop and expand this company. A company that has beginning money has various benefits. Perhaps its most major feature is the capacity to provide the financial resources necessary to begin a new firm.

## **VARIETY OF CULTURES**

Organizational culture represents the working environment, employee behavior, mental processes, beliefs and so on. In other terms, organizational culture is commonly referred to as work culture and it is critical in bringing out the best in people. Work culture must be healthy for employees to not only love their jobs but also to give their all and establish a sense of loyalty and commitment to their respective firms. Employees with a low level of communication will be one challenge for the company as they do not know how to communicate and collaborate well with employees with different cultures. On the other hand, companies must use an additional budget in order to prepare communication classes for their employees.

## **COMMUNITY ISSUES**

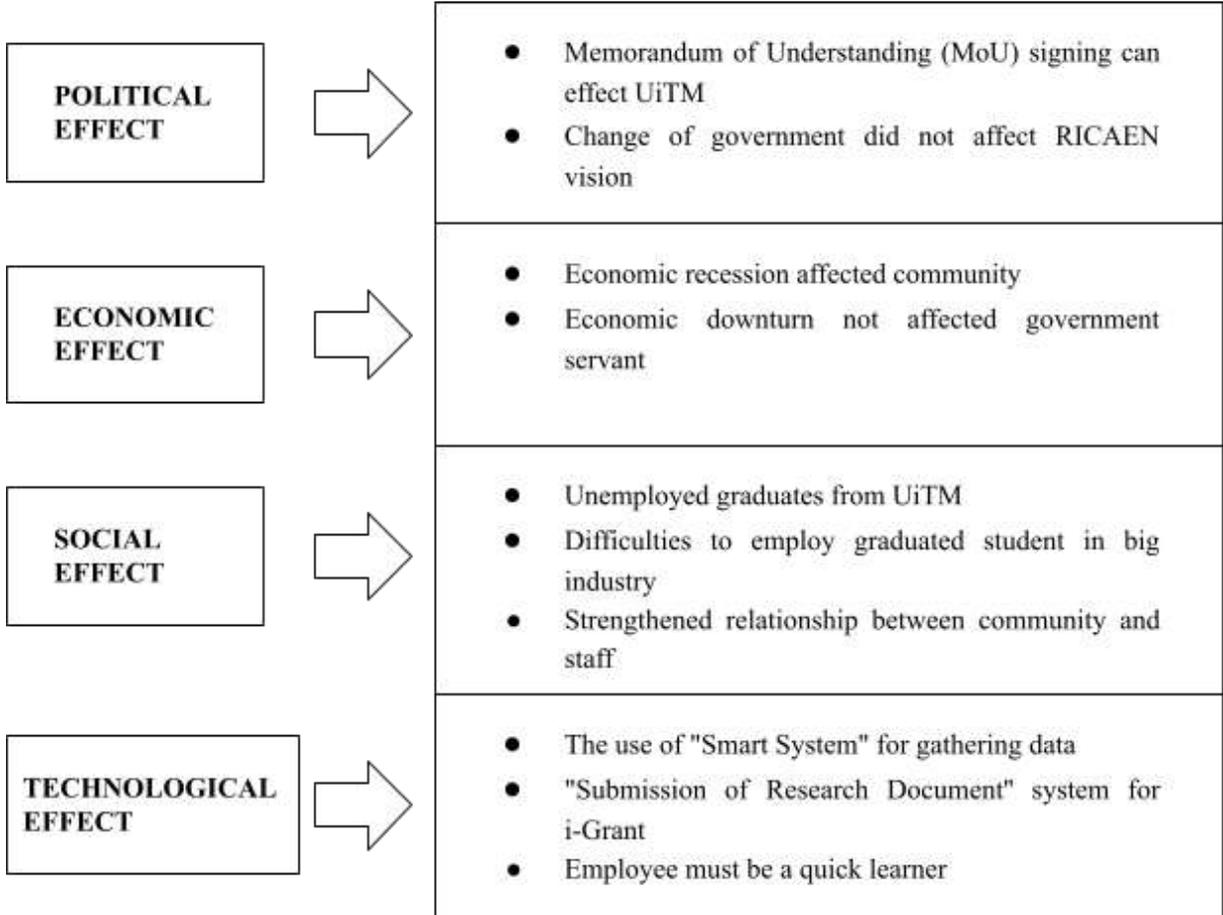

Besides, community issues also affect company image as people will see that this company never takes good care of the community. For example, RICAEN have one unit called ICAN which are responsible to do event and programs for the community. Nowadays, we can see that most people in Malaysia come from the B40 group. Community around this company from B40 groups must need some help from others. Because of that, this unit is responsible for creating welfare funds and giving help in terms of daily basic needs for some needed families around here. This problem is also one of the threats as the company must use more budget in order to buy necessary items. Besides, company image will be ruined when people see the company not taking care of the community welfare.

## **ALUMNI COMPETITION**

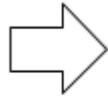

Lastly, competition between alumni from all other universities can affect the company. RICAEN is also responsible to catch up with UiTM alumni on what they do after finishing study in UiTM. According to Shukor (2020), it stated that the Education Minister of Malaysia reported that nearly 60 percent of degree holders and above remain unemployed after one year of graduating. Nowadays, many unemployed candidates come from university. RICAEN must

take care of the unemployment rates for alumni students from UiTM in order to give a positive image of the university. If UiTM has a high level of unemployed candidates after graduates, people will see no clear future for their children and family that may affect UiTM student intake.

**6.0 PESTEL**

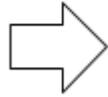

**ENVIRONMENTAL  
EFFECT**

- Storm affected the usage of company budget

**LEGAL  
EFFECT**

- Not affected RICAEN

## **7.0 DISCUSSION AND RECOMMENDATIONS**

### **7.1 JOB ROTATION AND TASK DELEGATION**

Employees may be moved from one position to another within the same department or between departments as part of a job rotation plan. Job rotation serves the dual purposes of exposing workers to a variety of jobs, competencies and viewpoints while also preventing boredom, monotony and burnout. Additionally, changing jobs may improve a person's professional chances, help them gain new skills and make them more flexible and adaptable. Workers are moved from one position to another within an organization in a systematic manner to fulfill various human resource objectives such as orienting new workers, training staff, promoting career growth and reducing job burnout. Job rotation enables a corporation to identify potential individuals and engage in training new skills throughout the organization. Task delegation can also assist to decrease turnover and retain employees who are familiar with how a business operates. Employees must have the leadership ability to adjust to new environments when jobs are rotated. By moving workers between different types of labor, the job rotation strategy broadens a worker's activities. Maizura, I et al., (2022)

### **7.2 ENTERPRISE INFORMATION MANAGEMENT (EIM) SOFTWARE**

EIM systems adapt to an organization's Internet access policy, allowing HR to monitor, control, and report on employee Internet traffic in real time. Time-based quotas allow HR to grant employees restricted but acceptable access to non-work-related sites. Filtering options are established based on the time of day. Access to shopping, for example, might be restricted during business hours but granted at all other times. 30 to 40 percent of employee Internet activity is non-work-related, according to International Data Corporation Research. According to recent research, fewer than 6 percent of Americans with Internet connections have high-speed access at home. Accessing new technologies like streaming media takes a high-speed connection, such as a T-1 or T-3 line, found most frequently in corporate environments where it is free to employees. For HR, this means employees are spending office hours downloading and viewing content using corporate resources. Patrik, E (2018)

### **7.3 ACTIVE IN BUSINESS EVENT**

Business Event means any activity, such as an industry conference, networking event, meeting or business meal, where the primary purpose is to engage in analytical, research or information-gathering activities or to conduct commercial activities. It could involve a regular, significant occurrence, like a consumer placing an order. Alternately, it might be a more specific occurrence, as when a consumer orders something and goes over their limit. Joining business events allows workers to communicate with one another on a more personal level and establish relationships that they may not have had the opportunity to develop earlier. Profit from site leasing and sales income from corporate booths are combined and can be as a company saving for the future event. Besides, the company should give VIP guests any UiTM product for free marketing and to seek sponsorship from large corporations. A business sponsorship is an organization's support of an event or activity, like a nonprofit, organization, group, trade show or local sports team, which usually comes in the form of a financial contribution. Organizations use sponsorships as a marketing tool so that they can gain a competitive advantage and reach business goals.

### **7.4 RECRUIT INTERNSHIP STUDENT FROM LOCAL UNIVERSITY**

Employers occasionally lose sight of the value of keeping their viewpoints current and abreast of industry developments because they are so preoccupied with operating their firm. Interns are a fantastic opportunity to offer fresh perspectives and ideas to the business. They frequently possess recent knowledge of the field and when paired with a positive outlook, they may be a source of fresh concepts and original answers. Internships enable businesses to invest in their own future success while also discovering fresh talent and future leaders. Interns can take on lower-level jobs, freeing up time for staff to complete additional responsibilities while saving the organization money. Employing interns may be a terrific way to help a company's operations and staff, especially during times of increased activity. The administrative burden is typically lightened by interns, allowing your staff to concentrate on other activities.

## **7.5 EMPLOYED PERSONAL COUNSELOR**

Workplace counseling is an employee support intervention that is typically of a brief duration and offers a free, specialized resource to persons working in various industries and workplace settings. It may be argued that providing free, private workplace counseling to all workers falls within an employer's duty of care. HR managers can play two roles in employee counseling which is functioning as counselors and offering counseling training. A helping partnership in which the counselor and the employee collaborate to solve an issue, improve behavior, or promote personal growth and awareness. The goal of the counseling process is to give employees a sounding board, a secure location to discuss their difficulties, and the opportunity to work with counselors to come up with their own answers or improve problem-solving techniques. It is about providing a non-judgmental, sympathetic, and approachable technique to help an employee identify a route ahead rather than offering advice.
