PREFACE

Haulage activities has become important in Malaysia since containerisation sector plays its part in the import and export business. Since that, many hauliers have begun competing after the first step, which was taken by Kontena Nasional Sdn. Bhd. to become the pioneer haulier in haulage business returned higher revenue than what was expected.

This study have been carried out to give a clearer picture of how the haulage business are conducted by a young haulage company, Multimodal Freight Sdn. Bhd. Moreover, the study is also done to connect the importance of a container yard with haulage activities.

The study have been divided into a few chapters with an emphasis on haulage and container yard operations in certain chapters. The examples of documents involved in the operations are also attached for reference.

Therefore, I hope that this study will contribute to the understanding of how haulage and container yard activities are carried out by a haulier after being practically involved in the activities for six months.

ACKNOWLEDGEMENT

This study has been made considerably easier by the assistance I have received from many people. Firstly, I would like to thank all the staff of Multimodal Freight Sdn. Bhd. who gave me a great deal of help, by spending their time to listen and answering all my doubts about the study and the freedom to observe the records and files.

I would also like to thank my Thesis Advisor, Puan Rosena Mohd Ali for her guidance, comments and advices in preparing the study.

I am indebted to all of The KTM Staff at The Kuala Lumpur Inland Clearance Depot. The information and guidance which they provided were important to the research upon this study is based.

I must also record my appreciation to The Officers of The Klang Container Terminal, for their permission to let me observed Gate 1 and 2 to see the flow of laden and empty containers.

Lastly, I would like to express my gratitude to a special friend, for the patience, support and typing this very exacting material, and also to my
