## **ACKNOWLEDGEMENT**

Alhamdulillah and praises to Allah S.W.T. who give me strength to complete this research. There are many challenges and obstacles come during the completion of this research. Luckily, I have received many help from many people in order to complete this research. Firstly, I would like to give a big thank to my supervisor, Madam Siti Khalijah Binti Majid who always gave a motivation and encouraged me to complete this research. She also gave me so many guidance and guideline for completing this research paper.

Not forget also to my research lecturer, Sir Mohamad Amlil Bin Baharom who had teach a lot about research including how to use SPSS for data analysing. Even though the things are not goes as I expected and planned, but with his help, everything had goes smoothly.

Last but not least, a great appreciation to my parents who give endless moral support and inspiration during the completion of my research. Besides that, also to all my friends who help me a lot for my research and to all respondents for their willingness to spent time for answering the questionnaires. Thank you so much.

## **ABSTRACT**

The title of the research is employees' perception on current office layout towards their productivity at Teo Tuan Kwee Sdn. Bhd.. This organization is logistic industries. Regarding the research title, researcher wants to study about the perception of the employees towards their current office layout and the impact on their productivity. From the past researches which mostly conducted outside form the Malaysia, researcher found that there are many theories and findings about the office layout and employees' productivity. Thus, in this study, researcher had investigated if the theories and findings found were be same for the organization in Malaysia which might be have a different culture and working environment. From researcher assumption, office layout can affect employees' productivity but most of the organization did not care about the type of office layout that they used. Therefore, this study had identified either office layout really affected employees' productivity.
