## ACKNOWLEDGEMENT

In the name of Allah, the Most Gracious and the Most Merciful

Alhamdulillah, all praise to Allah for the strengths and his blessing in completing my thesis. Special thanks to my parents and family for the endless support, patience, love and understanding throughout years of my studies.

Sincere thanks to my advisor Tn. Hj Wahi Ismail for the all support, advice, guidance and knowledge throughout the process in completing this final year project paper and not forgotten to Mr Sheikh Junaidi SM as my second examiner that have suggested ideas during my VIVA VOCE presentation. I would like to thank to all of the lecturers of Business Administration for the guidance and knowledge to me and my friends.

Not forgetting also to all of my friends and course mates especially Nurlaila Alias for helping me out and giving some ideas that valuable in the progression and completion of my thesis.

Thank you very much and I really appreciate it.

## ABSTRACT

The purpose of this study to see what affect women to be part in the market. This are not obsolete issue but it is happens to other country. Even there is ceiling glass means that women can never be over man but gender gap have it is effect on the output to the country. This issue have attracted many attention of other researcher that trying to solving and find the problem especially on OECD countries, India, Arab Countries but in my study it is focus on Malaysia and tried to solve this matter using Time Series Least Square, the finding shows there is strong relationship between women force and education.
