MAY 1991

ACKNOWLEDGEMENT.

I owe my thanks of being able to complete this thesis to my advisor, Puan Sabariah Jemali (CIT), a lecturer in Transport Studies. I appreciate her guidance and support very much.

Sincere appreciation also goes to Encik Amin Kassim (General Manager), Encik Mohd. Nasir b. Mohd. Hashim (Operation Executive), Encik Wan Yuzaidi Wan Musa (Assistant Operation Manager) and to all Green Peninsula Agencies Sdn. Bhd. (Kuala Lumpur and Port Klang) staffs for their cooperation and help.

I would also like to thank Encik Samsudin Mohamed Nor (Assistant Operation Manager) and Encik Mohd. Taib Kaman (Senior Operation Supervisor) and the people in the Operation Department of Pengkalan Eksport Perakayuan-Shapadu, who were very generous, cooperative and supportive all through my survey there.

I am grateful to Encik Zulkepli Abd. Rani (Penolong Pegawai Penggunaan Kayu), Malaysian Timber Industrial Board who had patiently and thoroughly dispence valuable information regarding the subject matters of the study.

ABSTRACT.

The process of packaging and stuffing of timber products had caused a lot of damage to the products themselves. This is due to the lack of caution on the part of the parties involved.

The exercise aimed to study the characteristics of three different timber products i.e sawntimber, plywood and mouldings and the different requirements for packaging and stuffing. Surveys have also been conducted to determine the exact method used in packaging and stuffing with photographs for illustration.

This exercise therefore, attempts to identify the most suitable packaging and stuffing methods from experience of established companies as part of the suggestions on methods to reduce these damages.

TABLE OF CONTENTS.

	Page.
Acknowledgement	
Abstract	
Table of Contents	
List of Figures	
List of Tables	
List of Plates	
List of Abbreviations	
List of Appendices	
 <u>CHAPTER ONE: INTRODUCTION.</u>	
1.0 Introduction	1 - 4
1.1 Problem Statement	5
1.2 Objectives	6
1.3 Hypothesis	7
1.4 Scope and Limitation	7
1.5 Methodologies	8
 <u>CHAPTER TWO: BACKGROUND OF TIMBER PRODUCTS</u>	
2.0 Introduction	9
2.1 Classification of Woods	9 - 11
2.2 Different Requirements in Production of Timber Products	13
2.2.1 Treatment	14
2.2.2 Seasoning	15 - 17
2.2.3 Grading	17 - 18
2.3 Timber Products Chosen in the Study	19
2.3.1 Production of sawntimber	19 - 21
2.3.2 Processing of rubberwood	24
2.3.3 Plywood	25 - 26
2.3.4 Mouldings	29 - 30
2.4 Handling of Timber Products	32 - 34

CHAPTER THREE: SURVEY CONDUCTED.

3.0	Field of Survey	35
3.1	Methods of Selecting Data	35
3.1.1	Interviews	35
3.1.2	Observations	36
3.2	Selected Organisations	36
3.2.1	Container Freight Station	36
3.2.2	Pengkalan Eksport Perakayuan	37
3.2.3	Finewood Sdn. Bhd.	37
3.3	Constraints and Limitation	38

CHAPTER FOUR: RESULTS OF SURVEY.

4.0	Export Procedures	39 - 40
4.1	Methods Obtained from Observation	
4.1.1	Packaging	40
(a)	Bundles	40 - 43
(b)	Crates	43 - 44
(c)	Pallets	45
4.1.2	Stuffing	46 - 47
(a)	Bundles	48 - 51
(b)	Crates and Pallets	53 - 55

CHAPTER FIVE: ANALYSIS OF SURVEY

5.0	Need to Analyse	56
5.1	Guidelines From Selected Organisation	
5.1.1	Packaging - PEPS	56 - 57
5.1.2	Stuffing - Johor Container Terminal	57 - 58
5.2	Problems Encountered	
5.2.1	Packaging	
(a)	Uneven length of timber pieces	59
(b)	Damage to product during strapping	59
(c)	Wrong markings	60
5.2.2	Stuffing	
(a)	Damage during stuffing of bundles	60 - 61
(b)	Overflow of cargo at CFS	61 - 62
(c)	Timing of Delivery	62
(d)	Availability of containers	62
