English is an international language, moreover english is an unifying language people around the world. English is very needed because with English we can build the communication and relation all around the world. Learning grammar is very important because sentence without grammar means nothing, the other reason is because to arrange sentence should use pattern, thus that sentence can be meaningful and understandable. Nowadays, Grammar is the biggest problem for english learner yet well-known as the most difficult part to learn English. We have the key to solve this most common problem. The key for this problem is learning grammar through EDUCARD (English Education Card). EDUCARD adapt the rules of “remi” in Bahasa or “Poker” in english. So, people who uses this media feel like they are playing, instead of learning grammar. The function of EDUCARD is as a learning english media especially tenses by arrange the sentence or phrase. This media forces the players to arrange a sentence by the card which they have with the correct grammar. EDUCARD is more accaptable in society because this tools are easy to carry, so the learner can learn english grammar anytime and everywhere. This media divided into three levels which are beginner, intermediate and advanced, thus make this media can be use for all generations to learn grammar. We made this media not in a software because we want the players also learn how to communicates with others since many people are busy with their gadget until they forgot how to socialize nowadays, besides through hardware make the learner easy to visualize and made their own fun games yet learning.
