For our innovation project, we called it as V-shock pen for student or workers that easily getting distraction in class or work place. Distraction such as daydreaming or getting sleepy in their works. The uniqueness for this project are, it will make a shock but not harmness for users. The users can set the clock as an alarm, when it is already the time, it will make some shock sense at the grip of pen. For this project, it will make sure that they will get rid of their lack in their works, or getting 'fresh' after the shock. It will looks fancy but useful for them and it will make they stay focus in their works.
