

UNIVERSITI TEKNOLOGI MARA

**DIVORCE PREDICTION USING
NAIVE BAYES**

ALIA HANNANI BINTI AHMAD BAKRI

BACHELOR OF COMPUTER SCIENCE (Hons.)

JANUARY 2024

ACKNOWLEDGEMENT

Alhamdulillah, thanks to Allah the Almighty for His graces and blessing, this study case would not have been possible. Firstly, I would also like to thank my supervisor, Madam Nor Hafizah binti Abd Razak for her support and word of encouragement. I received a lot of guidance and also her time and effort assisted me in completing this study.

Beside I would like to express my appreciation to Madam Ummu Fatimah binti Mohd Bahrain who is my lecturer for CSP600 and CSP650 for sharing her knowledge with me and my batchmate, motivating and supporting me throughout this semester.

Last but not least, I could nor have undertaken this journey without support of my family and my friends. Thanks to them, I didn't stop halfway.

ABSTRACT

The study focuses on developing a divorce prediction system using the Naïve Bayes algorithm, a widely used classifier. The system achieved 98% accuracy in predicting divorce based on a comprehensive dataset. This approach can aid professionals in marriage counselling and family therapy to identify high-risk couples and implement preventive measures. Furthermore, it can focus on enhancing the system's accuracy and applicability by expanding the dataset and incorporating more features.

TABLE OF CONTENTS

CONTENTS	PAGE
SUPERVISOR APPROVAL	i
STUDENT DECLARATION	ii
ACKNOWLEDGEMENT	iii
ABSTRACT	iv
TABLE OF CONTENTS	v
TABLE OF FIGURES	vii
TABLE OF TABLES	viii
CHAPTER 1	1
1.1 Background of Study	1
1.2 Problem Statement	2
1.3 Objective of Study	2
1.4 Project Scope	3
1.5 Project Significant	3
1.6 Research Framework	4
1.7 Conclusion	5
CHAPTER 2	6
2.1 Introduction	6
2.2 Prediction System	6
2.2.1 The Use of Prediction System	6
2.2.2 Type of Prediction	7
2.2.3 Phase of Prediction Process	8
2.2.4 Prediction Issues	9
2.3 Naïve Bayes	10
2.3.1 Naïve Bayes and How Does It Works	10
2.3.2 Advantage of Naïve Bayes	11
2.3.3 Disadvantage of Naïve Bayes	12
2.4 Implementation Naïve Bayes in Various Problem	13
2.5 Similar Work	17
2.5.1 Explanation of Similar Work	26
2.6 Implementation of Literature Review	30
2.7 Conclusion	31
CHAPTER 3	32

3.1	Overview of Research Framework Methodology	32
3.1.1	Detailed Research Framework	32
3.2	Preliminary Study	34
3.2.1	Literature of Study	34
3.2.2	Data Collection	35
3.2.3	Data Preparation	37
3.3	System Design	38
3.3.1	Prototype Architecture	38
3.3.2	Flowchart	39
3.3.3	Interface Design	40
3.4	Development	41
3.5	Performance Evaluation	41
3.5.1	Confusion Matrices	42
3.6	Gantt Chart	44
3.7	Conclusion	44
CHAPTER 4	45
4.1	Conceptual Framework	45
4.2	Result for Objective 1	46
4.2.1	Analysis of Literature Review on Naïve Bayes	46
4.2.2	Data Preparation	47
4.3	Result for Objective 2	48
4.3.1	Input Representation	48
4.3.2	Naïve Bayes Implementation	48
4.3.3	Prototype Interface	50
4.4	Result for Objective 3	53
4.4.1	Naïve Bayes Model Evaluation	53
4.5	Discussion	59
4.6	Conclusion	59
CHAPTER 5	60
5.1	Project Summary	60
5.2	Project Limitation	61
5.3	Future Recommendation	62
