## ACKNOWLEDGEMENT

I would love to thank everyone who helped me in this research from start until the end of the period. The discovery made was a life changing experience and surely had open up the way I view the everyday life in Subang Jaya. The parties that have been supporting my research:

1. Prof. Madya Dr. Ismail Bin Samsudin, as my tutor lecture who helps a lot on the technical aspects of the research.
2. Ar. Azman Zainonabidin, my supervisor who keep me on the right track till the completion of my research.
3. The librarians of UiTM Perak providing me all the resource related to the research.
4. The business owners and police officer that are willing to cooperate with me.
5. Friends and families and anyone involved in the research and discussions regarding the topic.

## **ABSTRACT**

The purpose of this research is to review the types of security implemented in the shoplots at Taipan Business Centre , USJ 10 Subang Jaya, Selangor. The purpose of choosing this place is because it is very popular to crime, Crime cases such as robberies for instance, occurs almost every day at Taipan. Safety precautions had been taken to reduce the amount of crime and also the amount of possible injuries or casualties. Security system is compulsory nowadays. Various kind of security system ranging from the low to the high security level of protection had been introduced to the market. It is necessary in order to deter crime and to maintain the security of space. Being said, the research paper will review on the types of security system applied in Taipan Business Centre USJ 10 (Subang Jaya) and the level of security it will provide. Prior to that, a simple few objectives have been made sure to realise this research paper.
