## **ACKNOWLEDGEMENT**

In the name of Allah, Most Gracious, Most Merciful. Praise be to God for consent to complete this research. Praise God for was to simplify the procedures for the completion of this study. Not to forget to my research advisor Mr. Azhan, for his guidance and advice given to me during the completion of this study. And at the head of my department coordinator for the opportunity to do this study. and the next most helpful in tutoring completing this study, Prof Dr Ismail.

Hopefully, with a little effort can provide benefits to all people, especially to students of architecture itself at Universiti Teknologi Mara (UiTM) Seri Iskandar, Perak. Wallahu'alam.

## **ABSTRACT**

The study of the level of the spatial comfort of housing at Seri Iskandar is conducted by the objective of, to identify the spatial comfort level of housing design in Seri Iskandar based on the study and a reading from the journal and also from the information got from my advisor. I also referring to the government portal for strong information and some book related to the study. This study is take placed at Seri Iskandar, Perak. Near to Universiti Teknologi Mara (uitm) Seri Iskandar, Perak. It is also placed minutes from Ipoh and an hour to Lumut. The most housing that are at Seri Iskandar is a terrace housing, so that my research will be focused to the terrace housing only. I carried out this study by doing some reading an observation and also a measurement are take placed. The study only focused at one type of design in Seri Iskandar that a latest design that had been seat by a person, a student. Spatial Comfort is more focusing to the sizes of area, ergonometics and the anthropometric of the design. So the measurement are important for this study. I also study on types of the spaces in house that include living room, kitchen, bathroom, porch and also yard. There are also an extra study about the terrace housing like the minimum floor area of the terrace housing. The study then will define either housing in Seri Iskandar achieve or not for the spatial comfort.
