DECEMBER 2018

STUDENT'S DECLARATION

I hereby declare that this report is my own work, except for extract and summaries for which the original references are stated herein, prepared during a practical training session that I underwent at Perunding Setiamaju Sdn. Bhd. for a duration of 14 weeks starting from 3 September 2018 and ended on 7 December 2018. It is submitted as one of the prerequisite requirements of DBG307 and accepted as a partial fulfillment of the requirements for obtaining the Diploma in Building.

Name : Mohd Mustafa Bin Abdul Malik

UiTM ID No : 2016454728

Date : 18 December 2018

ACKNOWLEDGEMENT

Alhamdulillah, thanks the Almighty Allah for protecting me, Mohd Mustafa Bin Abdul Malik from the harmful and unwanted accidents during the industrial training. I have successfully completed an industrial training session at company Perunding Setiamaju Sdn. Bhd. for 1 semester from 3 September 2018 till 7 December 2018.

First and foremost, I would like to extend my gratitude to all the staff at company Perunding Setiamaju Sdn. Bhd. especially to Cik Rihah Binti Sulaiman as my supervisor. Thanks Cik Rihah for accepting me to undergo industrial training at company Perunding Setiamaju Sdn. Bhd. and for the guidance, advice and help rendered throughout the period of training program. The internship opportunity I had with Perunding Setiamaju Sdn. Bhd, was a great chance for me in learning and get experience work with construction company. I am so grateful for having chance to meet so many wonderful persons who full of their experience in construction who led me through this internship period.

I would also like to thanks all UiTM lecturers that have taught and nurtured me in becoming a better student and person. I would also like to extend my deepest appreciation to the lecturers who are directly involved during my training period such as my Report Supervisor, En. Zulkifli Bin Abdul Halim who always response and give advices to complete this report. Thanks En. Zulkifli for helping me to choose the best title of this report and for checking the mistake of this report, so I can settle this report perfectly. Thanks En. Muhammad Naim Bin Mahyuddin as my Practical Training Coordinator who always get involved with all of practical students to complete this industrial training program smoothly. I would also like to thank Dr. Dzulkarnaen Bin Ismail as a Program Coordinator for your responsibility and your hard work to handle this program.

Last but not least, my special thanks to my beloved parents for their sacrifices over the years. Not to forget the financial aid that was given to me so that I able to undergo this industrial training healthy and I able to finish this report by using their financial aid. Also, thanks to my classmate who always help me when I need them and for their supportive comment and advices.

Thank you.

ABSTRACT

Sewerage systems are one of the most important infrastructures in construction of residential, industrial or commercial project as it determines the quality of life enjoyed by a community. This report will discuss about the process for obtaining the Sewerage Works Application (SWA) approval and Sewerage Works Completion (SWC) approval. This report was conducted for project ‘Proposed Construction of 1 Unit 2 Storey Bungalow on Lot 212228, Taman Peranginan Lembah Meru, Jelapang, Mukim Hulu Kinta, District of Kinta, 30020 Ipoh, Perak Darul Ridzuan’. The objective of this report is to identify the procedure that should be followed for obtaining the Sewerage Work Application (SWA) approval and Sewerage Work Completion (SWC) approval. The interview session has been made with the civil & structure engineer who’s a competent person. The main finding from the interview session was that there are several requirements and specifications from Suruhanjaya Perkhidmatan Air Negara (SPAN) that need to be complied with for approval. If the competent persons do not follow the requirements and specifications from SPAN, the application for SWA approval and SWC approval will not be approved.

CHAPTER 1 : INTRODUCTION

Sewerage is a planned system of sewers in a particular Authority's district, through which sewage is collected and removed to a disposal works (Chopra, 1994). Sewer is a pipe or conduit, generally closed, but normally not flowing full for carrying sewage or other waste liquids. Sewers are underground pipes or conduits which carry the sewage to a point of discharge or disposal. The sewer line can have various types of cross-sections (Jain & Sharma, 1991). Sewerage system can be divided into 2 systems. Firstly, a separate system which is sanitary sewage and storm water are collected separately, conveyed separately and disposed off separately. Secondly, a combined system which is both sanitary sewage and storm water are collected into the same pipe. It is best suited to areas, where rainfall is evenly distributed throughout the year (Reddy, 2008).

Sewage is the discharge from all types of sanitary appliances, including medical and industrial as well as domestic, collected into drains which are connected usually to a public sewer, or occasionally to a private septic tank for disposal (Chopra, 1994). Fresh sewage is either grey or light yellow in colour but stale sewage is dark brown in colour. Fresh sewage has inoffensive, mild earthy odour or even odourless but septic sewage produces odours because of ammonia, hydrogen sulphide, methane, carbon disulphide, indol and skatol (Reddy, 2008). The sewage may be treated or may not be treated before final disposal. Accordingly, there are various methods of sewage disposal as classified below:

- (1) Land irrigation disposal, (2) Dilution and purification, (3) Oxidation ponds, (4) Oxidation ditch (Jain & Sharma, 1991).

Disposal of sewage by dilution is the method to discharge the sewage into a stream or a large body of water such as lake or sea. The discharge of untreated sewage in water course pollutes the water, affecting quality and public health. The permissible limits of the constituents of sewage effluents discharged into inland surface water are laid down in IS: 4764-1973 (Vazirani & Chandola, 1996).

The other way to dispose the sewage can be made by disposing it into the septic tank. Septic tanks are constructed below ground level. These are usually designed so that waste water takes at least 24 hours to pass through them. These need to be cleaned every 1 to 4 years to remove accumulation of sludge. As far as possible they should be located along the exterior of the wall of building. (Meo & Mehta, 1992).

Advantages of septic tanks are they can be constructed easily, very little attention and skilled attendance is required, the effluent can be disposed of easily, without much trouble and the cost is quite small and within the reach of private householders (Punmia & Jain, 1996). There are many type of septic tanks, however, the aim of this is to discuss about the process to get approval of using septic tank as sewerage infrastructure for a bungalow.

1.1 Scope of Study

This report provides information regarding implementation of the process to obtain the Sewerage Works Application (SWA) approval and Sewerage Works Completion (SWC) approval for project ‘Proposed Construction of 1 Unit 2 Storey Bungalow on Lot 212228, Taman Peranginan Lembah Meru, Jelapang, Mukim Hulu Kinta, District of Kinta, 30020 Ipoh, Perak Darul Ridzuan’. This process involves the element of planning and design specifications associated with sewerage system and consists of two closely related processes:

- i. Submission of documents based on the checklist provided by Indah Water Konsortium (IWK).
- ii. Payment procedure for FI fee and KWSMP contribution.

1.2 Objectives

1.2.1 Aim

To obtain the Sewerage Works Application (SWA) approval and Sewerage Works Completion (SWC) approval for project ‘Proposed Construction of 1 Unit 2 Storey Bungalow on Lot 212228, Taman Peranginan Lembah Meru, Jelapang, Mukim Hulu Kinta, District of Kinta, 30020 Ipoh, Perak Darul Ridzuan’.

1.2.2 Objectives

- i. To identify the documents to be submitted for Sewerage Works Application (SWA) approval.
- ii. To investigate the procedure for obtaining Sewerage Works Completion (SWC) approval.

1.3 Method of Study

1.3.1 Primary Data

i. Interview

Interview sessions with the Civil & Structure Engineer who is in charge for sewerage system were done. The interviews took place in the office of the company Perunding Setiamaju Sdn. Bhd. The interview session was about 2 hours. The questions that have been prepared is crucially needed in order to gain all the information beforehand. Most of the information is recorded by writing short notes and the other information is obtained in the form of softcopy such as for drawing plan and photos.

ii. Observation

Upon reaching the site, observation has been made to see the septic tank used for sewerage system. Half an hour has been spent just for walking around the site, inspecting the type of septic tank used and the position of septic tank installed. Information was obtained by observing, taking pictures and jotting down all the important information.

iii. Document reviews

During the interview sessions with Civil & Structure Engineer, the documents such construction drawing, company profile, progress report and the pictures of sewerage system were obtained in the form of a softcopy.

1.3.2 Secondary Data

The main reason for doing a literature review is to study and find out information regarding the sewerage system on the types of system used and how to choose the most suitable one based on the type of the buildings through relevant books, articles and thesis at Tun Razak Library, Ipoh, Perak and UiTM Seri Iskandar library, Perak.

CHAPTER 2: COMPANY BACKGROUND

2.1 Introduction of Company

Perunding Setiamaju Sdn. Bhd. is established on February 2007, is a consulting engineering firm of two directors and nine committed capable employees. The directors for this company are Ir. Zulkifli Bin Ibrahim and Ir. Loh Ban Ho. The company registration number is 761435 H.

This company is located at 53, Jalan Bandar Timah, 30000 Ipoh, Perak. There are 2 contact numbers which are _____ and _____. The fax number is _____. The email for this company is psetiamaju@gmail.com.

The Company supplies consulting services in civil, transportation, environmental and structural design. It is the company's business to provide consistent, effective and efficient facility designs on time, and on budget, to satisfied clients. The other services from this company are the preparation of tender document, preparation of the progress reports and settlement of claim, financial control, payment certificates and statement of accounts. The mission of this company is to provide the most accurate, efficient and timely consultation services for the clients and to place the needs of the clients first and profit by helping them achieve success with their projects from conception through construction.

2.4 List of Projects

2.4.1 Completed Projects

Table 1: List of Perunding Setiamaju Sdn. Bhd. Completed Projects

No.	Project Name	Government / Private	Client	Start Date	Completed Date
1.	Proposed Modifications and Internal Renovations from Existing 2 Storey Shophouses to Hotel Budget Over Lot 635S and Part of 634S at Jalan Bandar Timah, Mukim Hulu Kinta, Ipoh, Perak Darul Ridzuan	Private	Mineral Hauling Sdn. Bhd. Loh Ban Ho & Sons Sdn. Bhd.	17 March 2016	3 May 2017
2.	Proposed Construction of 1 Unit 2 ½ Storey Bungalow on Lot 170378, Persiaran Bukit Meru 2, Meru Heights, Mukim Hulu Kinta, District of Kinta, Ipoh, Perak Darul Ridzuan	Private	Kinta Castle Builders Sdn. Bhd.	20 July 2014	1 Jan 2016
3.	Proposed Amendments and Additional 6 Units of Existing 2 Storey Shop Offices will be the Hotel (30 Rooms on the Upper Floor of the Lot 149352 – Lot 149357, 2 Rooms as well as the Hotel Lobby on the Ground Floor of the Lot 149354 and Parking Lot on the Ground Floor Lot 149354 & Lot 149355) at Jalan Lahat Bharu 4, Lahat, Mukim Hulu Kinta, District of Kinta, Perak Darul Ridzuan.	Private	Kinta Castle Builders Sdn. Bhd.	22 Nov. 2016	10 Jan. 2018
4.	Proposed Construction of 1 Unit 2 Storey Bungalow on Lot 212228, Taman Peranginan Lembah Meru, Jelapang, Mukim Hulu Kinta, District of Kinta, 30020 Ipoh, Perak Darul Ridzuan	Private	Loh Ban Ho & Sons Sdn. Bhd.	5 Oct. 2015	23 Dec. 2017

2.4.2 On-going Projects

Table 2: List of Perunding Setiamaju Sdn. Bhd. On-going Projects

No.	Project Name	Government / Private	Client	Start Date
1.	Proposed Construction of 2 Units 3 Storey Shop Office (Plot 1 & 3) on the Lot 13437, Jalan Datoh, Ipoh Mukim Hulu Kinta, Daerah Kinta, Perak.	Private	Kinta Castle Builders Sdn. Bhd	7 March 2017
2.	Proposed Construction of Housing Scheme That Contains: PHASE 1: -29 Unit 2 ½ Storey Terrace (PT25358-PT25372 & PT25388-PT25401) -6 Unit 2 ½ Storey Semi-D (PT25337-PT25342) -1 Unit Electrical Substations (PT25402) PHASE 2: -11 Unit 2 Storey Shop Office (PT25326-PT25336) -30 Unit 2 ½ Storey Terrace (PT25343-PT25357 & PT25373-PT25387) on Lot 1152, Mukim Durian Sebatang, Daerah Hilar Perak, Perak Darul Ridzuan	Private	Harpson Sdn. Bhd.	18 Sept. 2018
3.	Proposed Construction of 3 Unit 4 Storey Shop Office (Plot 5-7)-Phase 2 and 1 Unit 3 Storey Shop Office (Plot 8)-Phase 1; on Lot 13437, Jalan Datoh Ipoh, Mukim Hulu Kinta, Daerah Kinta, Perak	Private	Kinta Castle Builders Sdn. Bhd.	1 March 2018
4.	Proposed Construction of Jalan Bharu from Jalan Tanjung Rambutan (A13) to Laluan Persekutuan FT001, District of Kinta, Perak Darul Ridzuan	Government	Jabatan Kerja Raya Negeri Perak	1 Jan. 2018

CHAPTER 3: CASE STUDY

The project witnessed during the practical training session was the Proposed Construction of 1 Unit 2 Storey Bungalow on Lot 212228, Taman Peranginan Lembah Meru, Jelapang, Mukim Hulu Kinta, District of Kinta, 30020 Ipoh, Perak Darul Ridzuan. Total cost of the construction project is RM 477,340.00. This project began on the 5th October 2015 and completed on 23rd December 2017.

There are several parties involved in this project. They are Loh Ban Ho & Sons Sdn. Bhd. as the client, Kuee Architects, Perunding Setiamaju Sdn. Bhd. as the C&S Engineer, Kee Ming Electrical Sdn. Bhd., Chong Nam Father & Sons Construction Sdn. Bhd. as the contractor and Sukat Bina Rakan as the Surveyor.

Table 3: List of Consultant Involve

Client	Loh Ban Ho & Sons Sdn. Bhd.	53 Jalan Bandar Timah 30000 Ipoh Perak Darul Ridzuan
Architect	Kuee Architects	284A, Jalan Gopeng 31350 Ipoh, Perak
Civil & Structure Engineer	Perunding Setiamaju Sdn. Bhd.	53, Jalan Bandar Timah, 30000 Ipoh, Perak
Mechanical & Electrical Engineer	Kee Ming Electrical Sdn. Bhd.	195, Jalan Chung Ah Ming, 30000 Ipoh, Perak Darul Ridzuan.
Contractor	Choong Nam Father & Sons Construction Sdn Bhd	54-1 (Tingkat Atas), Jalan Ng Weng Hup Taman Pertama 30100 Ipoh Perak Darul Ridzuan
Surveyor	Sukat Bina Rakan,	No. 55, Jalan Lee Kwee Foh, Taman Canning, 31400 Ipoh, Perak

The proposed site was at Meru Valley, 30020, Ipoh, Perak Darul Ridzuan. The proposed development is a 1-unit bungalow on Lot 212228. It covers an area of 0.13 ha. The surrounding area has already been developed. This site was near the Meru Valley Resort and Meru Valley Golf & Country Club. The location in the figure 2 below shows the place where 1 unit 2 storey bungalow has been built.

For this case study, the focus is on the type of sewerage infrastructure used for 1-unit bungalow. A septic tank was chosen as the sewerage system at this site.

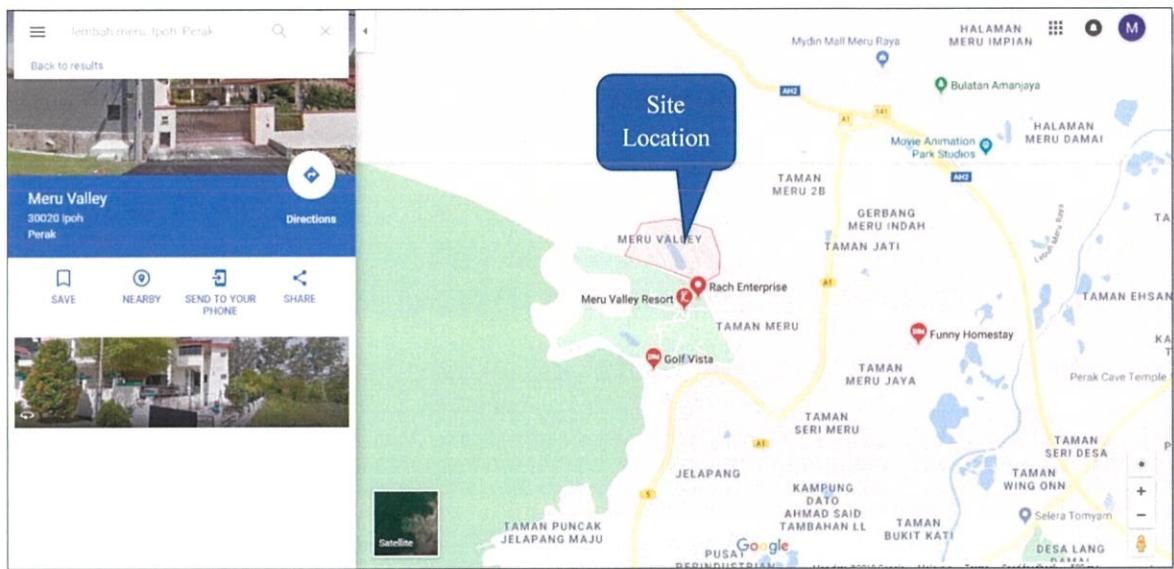

Figure 2: Site location

3.1 The Process for Obtaining Sewerage Works Application (SWA) approval

3.1.1 New Modeling Approval Processes

‘Garis Panduan Industri Pembentungan Malaysia Jilid II: Prosedur Kerja-Kerja Pembentungan Edisi Khas’ is provided to explain the new model plan to review approval procedures and specifications of sewerage works. It is a continuous improvement initiative by the Suruhanjaya Perkhidmatan Air Negara (SPAN) in streamlining the service delivery system to be more efficient and effective.

Under this new model, the approval procedure adopted is based on categorical risk levels, whether the risk is low, medium or high depending on the type of sewerage infrastructure built.

3.1.2 Scope and Criteria

New model approval procedures under the Low Risk category are specific to:

- i. Permitted development of the use of **septic tanks**.
- ii. Make **connection** from chamber / manhole of a premise to existing sewerage system and do not involve the need for a new network / sewer pipe network.
- iii. The development of a single premise with a population equivalent between 31 PE to 150 PE using (**Small Sewage Treatment System - SSTS**)

Low risk approval procedures involve only two (2) processes:

Table 4: Process of (Sewerage Works Application - SWA) and (Sewerage Works Completion - SWC)

Process	Procedure
1	<p>Application for (Sewerage Works Application - SWA)</p> <ul style="list-style-type: none">• Incorporating design elements and design specification shape.• Declaration of compliance with all condition the requirements outlined by the competent person.• Design approval by the certification agency is the principle of acceptance based on declaration of compliance certificate by a competent person referring to requirements and specifications which has been set by SPAN.
2	<p>Notice of (Sewerage Works Completion - SWC)</p> <ul style="list-style-type: none">• Declaration by competent persons that construction works of the sewerage infrastructure has been completed by adhering to the planning plan and design specifications that have been approved.

3.1.3 Application for (Sewerage Work Application – SWA)

V) Comment	<p>a) ‘Agensi Perakuan Pembentungan’ APP may issue a comment so that the amendment is made to the application submitted.</p> <p>b) The competent person shall re-submit the application within 6 months of the date of issue of the comment notifications from APP. Failure to do so is considered as a new application.</p>
VI) Approval	<p>a) APP will issue a letter of approval together with the relevant terms.</p> <p>b) Valid period for approval is 2 years from the date of approval.</p> <p>c) Construction work shall be completed within the approval period.</p> <p>d) Any further application of approval time is required to be submitted to APP 3 months prior to expiration of initial approval.</p>

I) General Matter

II) Documentation Requirement

Application documents should be submitted to the **Agensi Perakuan Pembentungan (APP)** appointed by the Suruhanjaya Perkhidmatan Air Negara (SPAN) that is:

- i. Indah Water Konsortium Sdn. Bhd. is for all states in Peninsular Malaysia (except for Kelantan) and Wilayah Persekutuan Kuala Lumpur, Labuan and Putrajaya; and
- ii. Majaari Services Sdn. Bhd. is for Kelantan state.

This checklist is provided by Indah Water Konsortium Sdn. Bhd. to the Perunding Setiamaju Sdn. Bhd. as the competent person. Perunding Setiamaju Sdn. Bhd. need to submit all of the documents required based on the checklist below to get approval. Perunding Setiamaju Sdn. Bhd. has submitted all of these documents on 26 November 2015.

Tuan,

PENGiktirafan 'ORANG YANG BERKELAYAKAN (QUALIFIED PERSON)' DI
BAWAH SEKSYEN 47(7) AKTA INDUSTRI PERKHIDMATAN AIR (IPA 2006)[AKTA
655]

Dengan segala hormatnya saya merujuk kepada perkara di atas.

2. Sukacita dimaklumkan bahawa tuan telah diiktiraf oleh Suruhanjaya ini sebagai 'orang yang berkelayakan' di bawah seksyen 47 Akta Industri Perkhidmatan Air 2006 berkuatkuasa mulai 10hb Februari 2009. Sila tuan rujuk laman web kami www.span.gov.my untuk butiran lanjut berhubung kelulusan ini. Sijil dan syarat-syarat akan dikemukakan kepada pihak tuan kemudian.

Sekian, terima kasih.

b.p **Ketua Pegawai Eksekutif**
Suruhanjaya Perkhidmatan Air Negara (SPAN)
Malaysia

Qualified Person

Figure 5: Certificate of recognition as a Qualified Person

2. Banker's Cheque (RM 150)

This banker's cheque is for FI fees that need to be paid by Perunding Setiamaju Sdn. Bhd. based on the type of infrastructure used and the amount of Population Equivalent (PE). The infrastructure used for sewerage system is a septic tank and the amount of PE is 5 PE for a bungalow. The fees amount is RM 150, can be referred from Table 1, (FI Processing).

Figure 6: Banker's cheque (RM 150) for FI fees

3. 'Sewerage Capital Contribution' SCC Checklist (RM 600)

This banker's cheque is for contribution fees to the 'Kumpulan Wang Sumbangan Modal Pembetungan' (KWSMP), calculated based on the amount of PE which is RM 120/ PE. The amount of PE is 5PE for a bungalow. So, the total of contribution fees is RM 600.

(a) Declaration

We hereby certify that the details stipulated in section (5) Table of Contribution Detail in SCC Form K-2 above are true, complete and accurate.

In the event of any discrepancy in the calculation of fixed rate of septic tank, sewage treatment works without sludge processing facility or sanitary power generator and/or specific building in section (5) Table of Contribution Detail in SCC Form K-2 resulting in insufficient amount paid hereunder with reference to Water Services Industry (Sewerage Capital Contribution Fund) Regulation 2011, We hereby undertake to immediately pay all sums still due and payable upon being notified to do so.

We hereby undertake to furnish the relevant documents and evidence for the information declared in section (5) Table of Contribution Detail in SCC Form K-2 within seven (7) days of Commission's request.

We fully aware and acknowledge that We are liable subjected to Section 130 Water Services Industry Act 2006 (Act 665) where enforcement action can be taken by the Commission if the documents, information or details as provided in section (5) Table of Contribution Detail in SCC Form K-2 of this form is false or misleading.

5.2 Ground levels of housing lots & roads <i>All data specified shall be according to the Survey Ordnance</i>	<input checked="" type="checkbox"/> <input type="checkbox"/>		
5.3 Reticulation & utilities details <i>Details shall include the following:</i>			
5.3.1 <i>Drainage system, water supply lines, streets or other structures and as far as can be established.</i>	<input checked="" type="checkbox"/> <input type="checkbox"/>		
5.3.2 <i>The location & depth of utilities that will affect or be affected by the proposed sewerage systems. Also their invert levels and sizes must be stated.</i>	<input checked="" type="checkbox"/> <input type="checkbox"/>		
5.3.3 <i>The sewer reticulation must also be shown on the same plan to show sewer location relative to these structures.</i>	<input checked="" type="checkbox"/> <input type="checkbox"/>		
6.0 Engineering report			
6.1 Land information <i>Information shall include the following:</i>			
6.1.1 <i>Land lot number & site location</i>	<input checked="" type="checkbox"/> <input type="checkbox"/>		

File No.: IWK_C_PK01/2015-106	Sewage Works OK	Submitted NC	Date: Reviewer's
6.1.2 Land area (hectares) & topography of project area.	<input type="checkbox"/>	<input type="checkbox"/>	
6.1.3 Topography of surrounding neighbouring areas. Specify one existing STPs or network. Include details of all sewerage systems in use or proposed in the adjacent areas.	<input type="checkbox"/>	<input type="checkbox"/>	
6.1.4 Water bodies (lakes/streams) that pass through project area including the name and class of the receiving water.	<input type="checkbox"/>	<input type="checkbox"/>	
6.1.5 Existing land use of project and adjacent areas, description of future land use of adjacent areas, if such information is available.	<input type="checkbox"/>	<input type="checkbox"/>	
6.1.6 Information on ground water levels and use of ground water adjacent to project area.	<input type="checkbox"/>	<input type="checkbox"/>	
 6.2 Project description <i>A description of the project proposal shall include:</i>			
6.2.1 Type of development various types of houses/buildings and their numbers.	<input type="checkbox"/>	<input type="checkbox"/>	
6.2.2 An outline on the derivation of the wastewater generation from the proposed project based on criteria in MSL223 and Guideline for Developers Vol.3 & 4.	<input type="checkbox"/>	<input type="checkbox"/>	
 6.3 Sewerage proposal <i>The sewerage proposal shall include:</i>			
6.3.1 A brief description of the project. For permanent STPs identify and evaluate all sewerage options, including NPV and non-cost factors and provide a brief description of the preferred or selected option.	<input type="checkbox"/>	<input type="checkbox"/>	
6.3.2 An outline description of the proposed sewerage network. Show breakdown and calculations.	<input type="checkbox"/>	<input type="checkbox"/>	
6.3.3 An outline of the reasons for the selection of the proposed sites for construction of any pumping stations.	<input type="checkbox"/>	<input type="checkbox"/>	
6.3.4 The proposal for conversion to the public sewer include a study on the capacity of the existing sewer and the STP.	<input type="checkbox"/>	<input type="checkbox"/>	
6.3.5 The report must bear the signature of the Engineer preparing the design as well as the report.	<input type="checkbox"/>	<input type="checkbox"/>	
6.3.6 The report must bear a suitable title, date, names of owner & consultants and have a proper cover & binding.	<input type="checkbox"/>	<input type="checkbox"/>	
6.3.7 The zoning criteria, land area & buffer zone requirement for the proposed STP shall be based on per Guidelines for Developers Vol. IV	<input type="checkbox"/>	<input type="checkbox"/>

6. Form SWA-LR

Form SWA-LR is divided into several sections which are Section 1-A, Section 1-B and Section 1-C for general information. Section 2-A is a declaration by an owner or a developer, Section 2-B is a declaration by a competent person for sewerage planning scope, Section 2-C is a declaration by a competent person for sewerage design (process or hydraulic) and Section 2-D is a declaration by competent person for sewerage design (civil and structure). This form is really important because it required a declaration from every party to get approval from Indah Water Konsortium Sdn. Bhd. as Agensi Perakuan Pembetungan (APP).

The image shows the SWA-LR Form with a large callout bubble containing the text "SWA-LR Form".

7. Engineering Report

Figure 15: Front Page for Engineering Report

1.0 Introduction

This application is for Planning Approval (SSA / PDC / 1) and Perunding Setiamaju Sdn. Bhd. has been appointed as a consultant engineer to prepare engineering reports to meet the requirements of the (Malaysia Sewerage Industry Guidelines Volume 2, 3rd Edition - Sewerage Works Procedures) Suruhanjaya Perkhidmatan Air Negara, SPAN.

The proposed development is a development housing schemes on Lot 212228. It covers an area of 0.13 Ha. The surrounding area has already been developed. This site was near with Meru Valley Resort and Meru Valley Golf & Country Club.

2.0 Proposed Development

The proposed development for the proposed site is for housing development which is a bungalow. Table 2.1 below shows in more detail the types of proposed development:

Table 2.1: Recommended Types of Development

NO.	TYPE OF DEVELOPMENT	UNIT	AREA (Ha)
HOUSING			
1.	Bungalow	1	0.13
TOTAL AMOUNT		1	0.13

Figure 16: Engineering Report (Introduction and Proposed Development)

3.0 Total Population Equivalent (PE)

Given the proposed development is for housing development, major waste water is coming from domestic waste. Any estimate of waste water from this proposed site is based on the criteria given in **MS 1228: Perkara 3.2. Rekabentuk Kadaralir Purata = 225 liters per person**. Based on **Table 1.1 – SPAN, Malaysian Sewerage Industry Guidelines, Sewerage Works Procedures, Volume 4, 3rd Edition**, the total Population Equivalent for the proposed development is **5PE**. Detailed estimates for this Population Equivalent are as shown in Table 3.1 below. To determine PE for this development proposal, please refer to the PE Calculation Schedule in Table 5.1 of this report.

Table 3.1: Estimates Population Equivalent

NO.	TYPE OF DEVELOPMENT	UNIT	PE/Unit	TOTAL (PE)
1.	Bungalow	1	5PE/Unit	5
Total Amount				5

4.0 Proposed Sewerage System

Based on **Table 1.1 - SPAN Malaysian Sewerage Industry Guidelines, Sewerage Works Procedures, Volume 4, 3rd Edition**, Population Equivalent for the proposed development are **5 PE**. Since the amount of PE for this development proposal is less than 150 PE, the individual septic tanks was recommended to be used for this proposed site.

Figure 17: Engineering Report Total (PE) and Proposed Sewerage System

5.0 PE Calculation Schedule

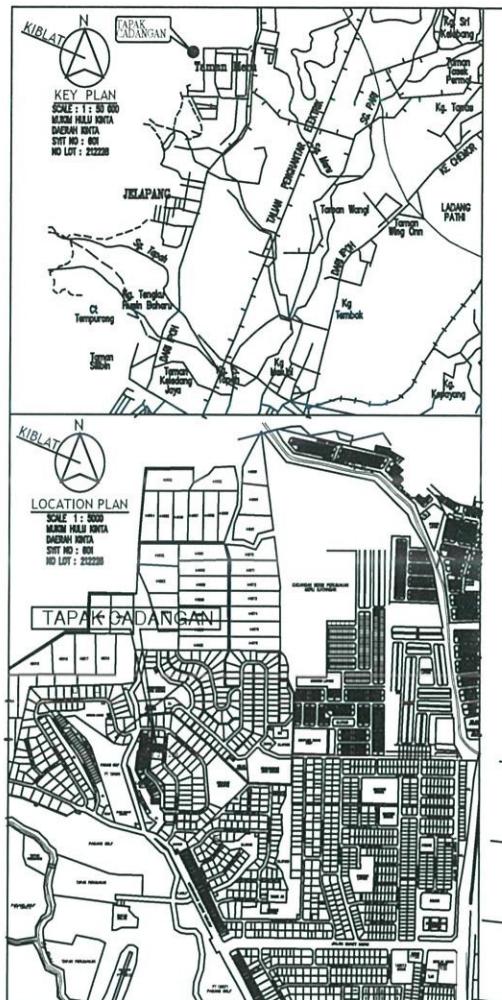

The calculation of Population Equivalent served by the completed development in accordance with MS 1228 and guidelines published by DGSS area as follows:

Table 5.1: Calculation of Population Equivalent (PE) for Contribution

NO	TYPE OF PREMISES/ ESTABLISHMENT	RECOMMENDED PE/Unit Quantity	UNIT (NO)	PE
1	Residential	5 per unit	1 units	5
2	Commercial	3 per 100m.sq	m.sq	
3	Community Facilities	3 per 100 m.sq	m.sq	
4	Market (Wet Type)	3 per stall	Stalls	
5	Market (Dry Type)	1 per stall	Stalls	
6	Hawker's Centre	3 per 100 m.sq	m.sq	
7	Surau, Religious Place, Church	0.2 per person	Persons	
8	School & Educational Institutions:			
	Day School/Institution	0.2 per student	Students	
	Fully Residential	1 per student	Students	
	Partial Residential	0.2 per non residential student 1 per residential student	Students Students	
9	Hospitals	4 per bed	Beds	
10	Bus Terminal	4 per bus bay	Bays	
11	Taxi Terminal	4 per taxi bay	Bays	
12	Stadium	0.2 per person	Person	
13	Public Toilet	15 per toilet	Toilets	
14	Airport	0.2 per passenger bay	Passenger Bays	
15	Factory	0.3 per employee	Employee	
16	Laundry	10 per machine	Machine	
17	Prison	1 per person	Persons

III) FI Processing

The figure below shows the amount of FI fees need to be paid by Perunding Setiamaju Sdn. Bhd. to Indah Water Konsortium Sdn. Bhd. FI fees should be referred from Table 1 as this table is provided by Suruhanjaya Perkhidmatan Air Negara (SPAN). The fees needed to be paid is RM150 for a septic tank for the proposed project bungalow with a Population Equivalent (PE) of 5PE.

JADUAL 1 FI		
JENIS SISTEM (Saiz Pembangunan)	PERMOHONAN KELULUSAN KERJA PEMBETUNGAN (SWA)	NOTIS PERAKUAN SIAP KERJA PEMBETUNGAN (SWC)
TANGKI SEPTIK		
Sehingga 5 PE	150	
6 PE - 150 PE	350	
Melebihi 150 PE	600	
SAMBUNGAN		
Sehingga 10 PE	200	
11 PE - 150 PE	420	600
151 PE - 500 PE	770	600
501 PE - 2,000 PE	1070	1200
Melebihi 2,000 PE	1170	1400
SISTEM RAWATAN KUMBAHAN KECIL (SSTS)		
Sehingga 150 PE	670	600

RM 150 is
for a Septic
Tank (5PE)

Figure 19: Table 1, FI Fees

IV) Processing Time

It just takes about 12 days to get SWA approval from Indah Water Konsortium Sdn. Bhd.

V) Comment

There is no comment from Indah Water Konsortium Sdn. Bhd. as Agensi Perakuan Pembetungan (APP). So, the documentation requirements were sufficient and complete and the design of sewerage system was accepted.

VI) Approval

The application for Sewerage Works Application-SWA has been approved. Indah Water Konsortium Sdn. Bhd. has already sent a letter of approval to Perunding Setiamaju Sdn. Bhd. on **8 December 2015**.

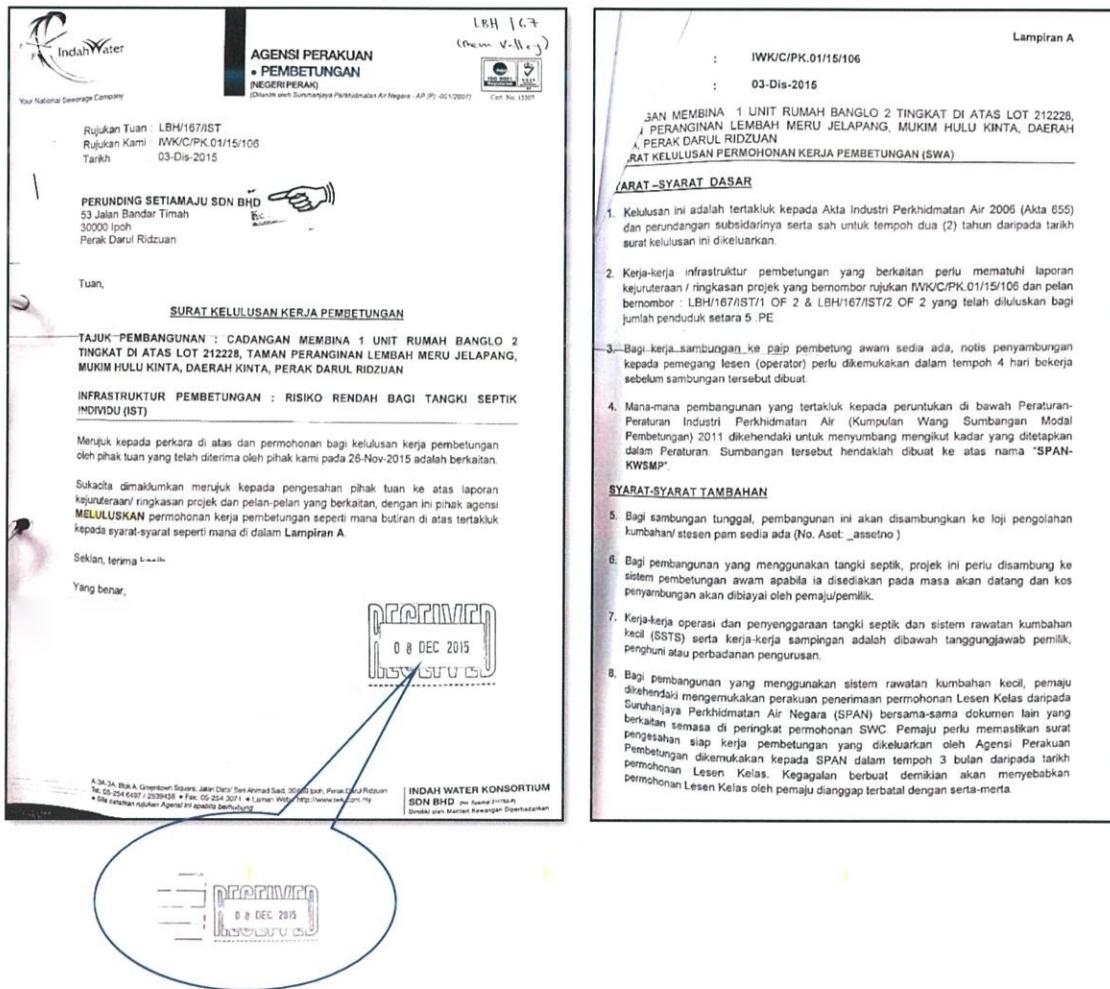

Figure 20: Approval Letter from Indah Water Konsortium Sdn. Bhd.

I) General Matter

II) Documentation Requirements

This checklist shows the documents should be submitted by a competent person, Perunding Setiamaju Sdn. Bhd. to get approval that sewerage system has been complete installed. Indah Water Konsortium Sdn. Bhd. will give SWC approval letter if these requirements complete and sufficient. All of this document had been sent on 28 November 2017.

2. Form SWC-LR

These forms provided to inform the general information at Section 1-A and Section 1-B. Also, it is provided to get a declaration from the owner at Section 2-A, declaration from a competent person at Section 2-B and declaration from the permit holder at Section 2-C. Section 2-C is a declaration from the person who provide and install the septic tank at the proposed project. The septic tank used for this project is type JH 2.

The diagram illustrates the SWC-LR Form, which is split into two pages:

- Page 1 (Section 1-A):** Labeled "SWC-LR Form" and "Section 1-A". It contains fields for "Title of Project/Development" (specifying "CADANGAN MEMBINA 1 UNIT RUMAH BANGLO 2 TINGKAT DI ATAS LOT 212228, TAMAN PERANGINAN LEMBAH MERU JELAPANG, MUKIM HULU KINTA, DAERAH KINTA, PERAK DARUL RIDZUAN UNTUK TETUAN LOH BAN HO & SONS SDN. BHD."), "Population Equivalent (PE)" (5 PE), and "Types of Infrastructure" (Connection to asset no., Septic Tank checked, Small Sewage Treatment System (SSTS)).
- Page 2 (Section 2-A):** Labeled "Section 2-A". It contains a "DECLARATION" section with a checkbox for "I declare that the relevant sewerage works in this development has been completed in strict compliance with the Water Services Industry Act 2006, its subsidiary legislations and conditions as stipulated and imposed by the Commission." Below this is a "Signature" field, followed by "Name of Owner/Authorized Person" (Lee Lai Piping), "IC No. / Passport No.", "Designation", "Company Name" (TETUAN LOH BAN HO & SONS SDN. BHD.), "Company Address" (NO. 53, JALAN BANDAR TIMAH, 30000 IPOH, PERAK DARUL RIDZUAN), "Company Registration No" (782690-H), "Telephone No", and "Fax No".

Both pages include the header "SURUHANJAYA PERKHIDMATAN AIR NEGARA (SPAN) Sewerage Works Application (SWC-LR)" and the footer "SURUHANJAYA PERKHIDMATAN AIR NEGARA (SPAN) Sewerage Works Completion (SWC-LR)".

JAN MEMBINA 1 UNIT RUMAH BANGLO 2 TINGKAT DI ATAS LOT 212228, TAMAN PERANGINAN LEMBAH MERU JELAPANG, MUKIM HULU KINTA, DAERAH PERAK DARUL RIDZUAN

SYARAT-KELULUSAN PERMOHONAN KERJA PEMBETUNGAN (SWA)

SYARAT-SYARAT DASAR

- Kelulusan ini adalah tertakluk kepada Akta Industri Perkhidmatan Air 2006 (Akta 655) dan perundungan subsidarnya serta sah untuk tempoh dua (2) tahun daripada tarikh surat kelulusan ini dikeluarkan.
- Kerja-kerja infrastruktur pembetungan yang berkaitan perlu mematuhi laporan kejuruteraan / ringkasan projek yang bermobor rujukan IWK/C/PK.01/15/106 dan pelan bermobor : LBH/167/IST/1 OF 2 & LBH/167/IST/2 OF 2 yang telah diluluskan bagi jumlah penduduk setara 5 ..PE.
- Bagi kerja sambungan ke paip pembetungan awam sedia ada, notis penyambungan kepada pemegang lesen (operator) perlu dikemukakan dalam tempoh 4 hari bekerja sebelum sambungan tersebut dibuat.
- Manfa-mana pembangunan yang tertakluk kepada peruntukan di bawah Peraturan-Peraturan Industri Perkhidmatan Air (Kumpulan Wang Sumbangan Modal Pembetungan) 2011 dikehendaki untuk menyumbang mengikut kadar yang ditetapkan dalam Peraturan Sumbangan tersebut hendaklah dibuat ke atas nama "SPAN-KWSPM".

SYARAT-SYARAT TAMBAHAN

- Bagi sambungan tunggal, pembangunan ini akan disambungkan ke loji pengolahan kumbahan/stesen pam sedia ada (No. Aset ..._assetno)
- Dagi pembangunan yang menggunakan tangki septic, projek ini perlu disambung ke sistem pembetungan awam apabila ia disediakan pada masa akan datang dan kos penyambungan akan dibayari oleh pemaju/pemilik.
- Kerja-kerja operasi dan penyenggaran tangki septic dan sistem rawatan kumbahan kecil (SSTS) serta kerja-kerja sampaingan adalah dibawah tanggungjawab pemilik, penghuni atau perbadanan pengurusan.
- Bagi pembangunan yang menggunakan sistem rawatan kumbahan kecil, pemaju dikehendaki mengemukakan perakuan penerimaan permohonan Lesen Kelas daripada Suruhanjaya Perkhidmatan Air Negara (SPAN) bersama-sama dokumen lain yang berkaitan semasa di peringkat permohonan SWC. Pemaju perlu memastikan surat pengesahan siap kerja pembetungan yang dikeluarkan oleh Agensi Perakuan Pembetungan dikenakan kepada SPAN dalam tempoh 3 bulan daripada tarikh permohonan Lesen Kelas. Kegagalan berbuat demikian akan menyebabkan permohonan Lesen Kelas oleh pemaju dianggap terbatalkan dengan serta-merta.

Figure 26: (Sewerage Works Application-SWA) Approval Letter

4. Contractor license (Permit SPAN)

The contractor who provide and install the septic tank was J.H. Fibreglass Industries Sdn. Bhd. The contractor gets this permit from SPAN, so they are qualified to do sewerage works like installing septic tanks.

III) FI Processing

FI fees does not need to be paid since it was paid during application for SWA approval.

IV) Processing Time

It takes 2 days to get approval from Agensi Perakuan Pembetungan (APP). The application for SWC approval had been sent on 28 November 2017. Perunding Setiamaju Sdn. Bhd. obtained SWC approval from Indah Water Konsortium Sdn. Bhd. on 30 November 2017.

V) Approval

Sewerage Works Completion (SWC) has been approved by Indah Water Konsortium Sdn. Bhd. on 30 November 2017. So, the sewerage system for the project ‘Proposed Construction and Completion of 1 Unit 2 Storey Bungalow on Lot 212228, Taman Peranginan Lembah Meru, Jelapang, Mukim Hulu Kinta, District of Kinta, 30020 Ipoh, Perak Darul Ridzuan’ is safe and secure.

Figure 30: Sewerage Works Completion (SWC) Approval Letter

CHAPTER 4: CONCLUSIONS

In conclusion, Sewerage Works Application (SWA) is an application to get approval from Agensi Perakuan Pembetungan (APP). It contains the declaration of compliance with all conditions of requirements by APP. Also, competent persons will prepare the design of sewerage system referring to the requirements and specifications which has been set by Suruhanjaya Perkhidmatan Air Negara (SPAN). If competent persons do not follow the requirements from SPAN, this application will not be approved.

Sewerage Works Completion (SWC) is also an application to get approval from APP. This application is a declaration by a competent person that construction works of the sewerage infrastructure has been completed by adhering to the planning plan and design specifications that have been approved.
