APPLICATION OF ANALYTIC HIERARCHY PROCESS (AHP) IN SELECTING THE BEST TRANSPORTATION FROM EAST COAST TO WEST COAST OF PENINSULAR MALAYSIA DURING PUBLIC HOLIDAY

NUR AINA AQILAH BINTI ZULKAFLI

Thesis Submitted in Fulfilment of the Requirement for Bachelor of Science (Hons.) Mathematical Modelling and Analytics in the College of Computing, Informatics and Mathematics Universiti Teknologi MARA

AUGUST 2023

ABSTRACT

The Analytic Hierarchy Process (AHP) method is one of the methods used for Multi Criteria Decision Making (MCDM). The value of maximum eigenvalue (λ_{max}) in this research study is used to determine the consistency of the pairwise comparison matrix before finalising the results. From the six criteria (cost, reliability, safety, capacity, duration, utility) and three alternatives (own car, bus, aeroplane), a total of twenty-one pairwise comparison matrices were built. The data is obtained in the form of three categories of overall data, married and single data. From the results, the objectives to find the most preferable transportation, the priority criteria leading to choose the preferable transportation and the best transportation to use during Eid al- Fitr from the East Coast to the West Coast of Peninsular Malaysia during public holiday are achieved. In conclusion, own car has been chosen as the best transportation due to its dominating the charts and placing first in many criteria's rankings.

ACKNOWLEDGEMENT

Praise be to Allah for His blessings and guidance in completing this year-long study. I am deeply grateful for His divine approval that has led me this far. I sincerely thank my supervisor, Madam Rohayati binti Mat Ripin, for her invaluable guidance throughout this project. Her insight and constant support significantly influenced this study's direction. My gratitude extends to other lecturers, particularly Dr. Syazwani binti Mohd Zokri, for her helpful insights during the proposal stage and for introducing me to the capabilities of the End Note program. Appreciation is also due to Dr. Nur Atikah binti Salahudin, the Final Year Project Coordinator, for her helpful advice in concluding this research. Despite the physical distance created by the Titiwangsa range, my heartfelt thanks go out to my parents for their enduring support. Their encouragement and unwavering faith in me kept me motivated. Their love continually fuels my drive to complete my assignments. Lastly, I appreciate my peers for their shared knowledge and expertise. To all those mentioned and those inadvertently omitted, thank you. Your contributions were crucial in bringing this project to fruition.
