ACKNOWLEDGEMENT

First and foremost, I am Rabiatal Adawiyah binti Kamarudin would like to take this opportunity to express my deepest and most sincere gratitude to Allah s.w.t. for giving me strength, faith and courage to complete my project paper successfully. Thanks for this wonderful achievement that I have never dream before this.

Next, I would like to thank to my research supervisors, Madam Noorain binti Nordin. Without her assistance and dedicated involvement in every step throughout the process, this paper would have never been accomplished. I would like to thank you very much for your support and understanding over these past few months.

Besides that, I would like to express my appreciation and thanks for those who are involved directly and indirectly especially my fellow friends during the making of this project paper. We always share ideas and opinion in order to ensure that we can move together in project paper task.

Most importantly, none of this could have happened without my family. To my parents and my siblings, it would be an understatement to say that, as a family, we have experienced some ups and downs in the past three years. Every time I was ready to quit, you did not let me and I am forever grateful. This dissertation stands as a testament to your unconditional love and encouragement.

ABSTRACT

Movement Control Order (MCO) enforced by government has become one of obstacle for every seller to operate their businesses. Seller needs to bear financial losses due to this situation. To avoid this unwanted issues regarding of the business that cannot operate normally, sellers need to identify and investigate this issue on what factors that able to influence online purchase intention in order to come out with solution that could cater this situation. Therefore, in this study, the researcher decides to investigate the relationship between financial risk, time risk and psychological risk towards online purchase intention among generation Y during Movement Control Order. Sampling technique used in this study is non-probability sampling which is convenience. The data was gathered through questionnaires involving 125 respondents. The researcher had examined four factors which included financial risk, time risk and psychological risk as independent variables. In order to obtain the result, the researcher used SPSS Based on the finding that the researcher obtained, the most significant factor is online purchase intention.
