ABSTRACT

E-Services Computer system (ESC) is an online service of renting computer and providing computer maintenance information. ESC has been set up to give companies that provide computer services an easy of putting their renting computer information and view computer maintenance status. This ESC was there to put companies that provide computer services and student can make computer services like computer renting by company selected. This project aims to create a system where any company can adding their computer rent information and student can choose company to make services. The company also can put computer maintenance status to the student and student can view the maintenance status either under maintenance or done. The E-Services Computer System is an alternative approach that allowed company can put their computer services and student can make their services within this system. This project is using the behavior of common computer services as an approach, which is allowed user to list, select, view the renting computer and computer maintenance information through online. A user interface for E-Service Computer System was developed using Macromedia Dreamweaver and the interfaces of the system were designed using Adobe Photoshop, SwishMAX and Macromedia Flash MX. PHP: Hypertext Preprocessor is being used as a programming language platform for designing and developing this system. MySQL is the database programs that been used in this system and it was create for developing and support complete management database. As the conclusion, E-Services Computer System will take advantage of new content and delivery technology to enable E-Services Computer system provide renting computer listing and information service.

TABLE OF CONTENTS

CONTENT	PAGE
APPROVAL	ii
DECLARATION	iii
ACKNOWLEDGEMENT	iv
ABSTRACT	v
LIST OF TABLES	x
LIST OF FIGURES	xi
LIST OF APPENDICES	xii
 CHAPTER 1 : INTRODUCTION	
1.1 Introduction	1
1.2 Research Background	2
1.3 Problem Statement	2
1.4 Project Objective	3
1.5 Project Scope	3
1.6 Project Significance	4
1.7 Project Limitations	6
 CHAPTER 2 : LITERATURE REVIEW	
2.1 Introduction	7
2.2 Definition of E-Services	7
2.3 Developing Trends of E-Services in Internet World	11

2.3.1	The blooming of pay-for-use public information service system	11
2.3.2	The new e-services system will grow dramatically providing totally new features	11
2.4	E-Service Design and Performance	12
2.5	Service Quality	14
2.6	What Computer Service Provide	15
2.6.1	Computer rentals	16
2.6.2	Computer Maintenance	16
2.6.3	Catalog	16
2.7	Requirements in Developing E-Services Computer System	17
2.7.1	Web Server: Apache Web Server	17
2.7.2	Programming Language: Hypertext Preprocessor (PHP)	17
2.7.3	Database: MySQL	18
2.7.4	Database Administrator: phpMyAdmin	18
2.8	Summary	19

CHAPTER 3 : METHODOLOGY

3.1	Planning	22
3.1.1	Define the Problem	22
3.1.1.1	Research Problem	22
3.1.1.2	Scope	24
3.1.2	Produce the Project Timeline	24
3.2	Data Collection	24
3.2.1	Primary Data	24
3.2.2	Secondary Data	25
3.3	Data Analysis	25
3.3.1	Define System Requirement	26
